Management report

CPR INVEST – SILVER AGE

2018 was a transitional year marked by the end of quantitative easing in Europe and the beginning of the policy of monetary tightening in the USA against a background of protectionist tensions and Brexit, which investors fear may cause a real reversal in the cycle.

In this context, the year may be analysed in 2 separate parts:

From 1 January to 30 August 2018, the markets continued to position themselves on defensive growth securities, without taking into account the policy of monetary tightening that began in the 4th quarter of 2017. In this context, the technology, IT services and medical equipment manufacturing sectors outperformed, while the automobile, banks and telecoms sectors marked time

Then, from September 2018, the European markets, destabilised by the rise in American interest rates, reacted violently due to volume of sales by international investors, who unreservedly got rid of all securities that outperformed over the last 5 years. Thus, the mid-caps and technological sectors lost an average of 25% to 30% over the last 3 months of the year. The positive performance gap, between the growth style and the value style, which reached historic heights since 2009 and the beginning of the QE policy, marked time.

The MSCI Europe ended the year 10% down in euros. The defensive sectors were in the lead, notably services to local authorities (+2.9%) and health (-0.4%), accompanied by energy (-0.6%) and followed further behind by telecoms (-8.4%) and non-cyclical consumption (-9%). However, the more cyclical sectors such as materials (-15%) and industrial securities (-13%) suffered badly, followed by the real estate sector (-14.5%). Lastly, financial securities (-19.2%) saw the greatest sectoral drop over the period.

Management strategy

The strategy put in place may be broken down into 2 major periods: from 1 January to 31 August, the Sub-Fund delivered positive performance and broadly outperformed its benchmark index, driven mainly by medical equipment manufacturers, often mid-caps, and pharmaceutical laboratories. During this period, European markets were driven overall by growth securities and the Sub-Fund, from February 2018, positioned itself on this style, after a year 2017 that was more driven by cyclical securities and a "value" style.

From September, the markets radically changed trend and beyond the trends in the markets, the factors which had driven the markets until then changed radically, going from a market driven by a growth and small-caps style, to a market with no particular readability until mid to end October when, overall, given the general rise in volatility in the markets, the strategy consisted of reducing the most cyclical and high-volatility sectors, preferring the most defensive securities in the investment sphere, such as pharmacy and personal care and well-being products, to the detriment of cars and financial savings securities. During this 4 month period, the Sub-Fund lost the progress that it had made in terms of performance. The sectors of Security, Automobile and Asset Management, and especially all of the mid-caps, penalised by their lack of liquidity, weighed heavily upon performance.

CPR INVEST – REACTIVE

2018 was a year full of promise. Between the pursuit of Goldilocks, the implementation of the tax reform in the US and synchronised economic growth in the developed countries, 2018 had everything to make it an exceptional year. This was without counting on our traditional endocrine disrupter, Donald Trump, who started a large-scale trade war. The main target country of the truculent President of the United States: China and its highly personal vision of the protection of property rights. Add to this the election of a populist government in Italy, difficult withdrawal for investors lacking liquidity and the chronic inability of Europe to break itself up calmly and you will understand why 2018 was the worst year, in terms of stock-market performance, since 2011. Worse still, 2018 was the first year (or almost) which allied bond performance and negative shares, consequently making the work of an asset allocator particularly perilous.

Numerous events punctuated 2018 and the markets underwent an emotional lift on several occasions, with investors alternating phases of confidence and phases of turbulence. And for good reason, when we know that the year began with drums beating, with the American tax reform and remarkable growth. It should be noted that it was the exuberance of the markets that was in the news at the beginning of the year, before the continuing normalisation of the Fed's monetary policy rang the bell ending playtime, leading to the slippage of long American rates, a sufficient phenomenon to cause a technical fallback after the pleasant madness of January. This was followed by a phase when economic indicators recovered and a market stabilisation phase, in the context of confidence in worldwide growth.

Then, at the end of the first quarter, all of these convictions were violently shaken up by the first tensions between the United States and the rest of the world concerning trade... the trade war began. Tensions that were also exacerbated by a resurgence of political stress on nearly all continents, and more precisely in Europe: in Italy with the election of a resolutely populist party, and in the United Kingdom with the political disappointments of Theresa May concerning Brexit.

To close this long phase of uncertainties, the United States also joined the group of doubtful zones, with a multitude of worrying events and D. Trump monopolising attention. Between the détente displayed by the American and Chinese leaders at the G20 in Buenos Aires, the arrest in Canada of the daughter of the founder of the telecoms equipment manufacturer Huawei, contrasting macroeconomic indicators, the request for extradition by the American courts, and the threat of a shutdown made by D. Trump, investors underwent a roller coaster ride and severely penalised American indices. Consequently, the Dow Jones was corrected by more than -10% over the last month of the year, the worst month of December for the index since... the Great Depression of the 1930s.

Responsive management, constantly adapting

At the beginning of January, in the optimistic environment initiated by the tax policy of the US President, we began the year with confidence, maintaining share exposure of between 55% and 60% on the CPR Reactive Growth portfolio, accompanying the strong start to January. But aware of the financial upsurge and the rapid rise in the share markets, we introduced optional hedging positions that enabled us to handle the strong downturn in February. Following this drop, our strategy was clear: take advantage of the disconnection between macroeconomic data (positive) and the level of the stock markets (negative). We therefore took advantage of the overreaction of the markets to gradually buy at-risk assets.

As the prospects for the worldwide economy reached a major turning point in March, following the large-scale trade war initiated by the truculent president of the United States, we anticipated an eventual negative impact on worldwide growth. As anticipated, the markets reacted badly

and our policy of gradual repurchasing on this fallback hit the performance of the Sub-Fund. We nevertheless held our course during April, anticipating the outlines of a trade agreement between the major powers. This context of temporary calm benefited the performance of the Sub-Fund. Our low sensitivity combined with reactive share exposure enabled the portfolio to successfully cross this somewhat troubled period.

The arrival of a new political risk in May sent shivers through the markets, which would also now have to learn to cope with the regular tweets and other political declarations of the Italian Northern League or concerning Brexit. Our strong exposure to the dollar played its role, protecting the portfolio during the summer.

Since October, and as good economic and political news became more scarce, investors became more pessimistic, fears that were confirmed by massive sales in the stock and bond markets. In the context of this massive downward movement, sparing no assets, quite logically, our performance was negatively affected.

On the eve of a decision that should be historic, we are maintaining our course and our equity investments preferring developed countries, for which growth should slow, next year, while remaining above long-term potential.

Management Report (continued)

CPR INVEST – EURO HIGH DIVIDEND

During 2018, and in line with its management objective, the Sub-Fund remained exposed to securities with a higher dividend yield and a higher probability of the dividend actually being paid. With an average of approximately 70 securities over the year, the Sub-Fund has an ex ante tracking error of close to 5% and very marked sector bets.

In view of its "dividend" theme, the Sub-Fund remained massively over-weighted in the utilities sector (+19.05% in absolute weight, representing average overweight of +11.6%), insurance (+12.05% in absolute weight, representing average overweight of 6.65%) and lastly telecoms (+8.6% in absolute weight, representing average overweight of +4.70%) to the detriment of capital goods (+3.5% in absolute weight, representing average underweight of -7.6%), durable consumer goods (0.5% in absolute weight, representing average underweight of -4.7%) and lastly personal care products (0.00% in absolute weight, representing an average underweight of -4.10%).

As far as geographical bets are concerned, the Sub-Fund remained massively underweight on Germany (+13.92% representing underweight of -15.32%) and overweight on Spain (21.6% in absolute weight, representing overweight of +12.03%).

During the period under review, the main positive contributors to the performance were TAG Immobilien, GTT and Naturgy Energy, while the main negative contributors were Schaeffler, Antenna3 and BE semi conductor.

If we analyse the macroeconomic forecasts for 2019 on the traditional aggregates, growth will admittedly be slower than anticipated, but still greater than its long-term level.

In this context, we may consider that the markets have overreacted downwards, leaving glimpses of upwards opportunities.

Yet investors appear to have closed an upward cycle of 10 years, leaving behind them a "peak" in profits and leading to the sale of securities where most of the flows were concentrated. However, in looking closely, this end of the cycle is not "traditional". Indeed, we have seen no inflation of inputs or rise in wages that is sufficiently large to cause company revenues to drop.

If this last upwards cycle was not traditional, it is because it was characterised by asset price inflation due to the various unconventional policies of the central banks.

However, since September 2018, the operators have become aware that:

- 1- we are moving into a new world, or rather, we are returning to the old "normal" world, without quantitative easing, where risk must be remunerated at its fair value, without the intervention of the central banks.
- 2 - the "rules of the game" are undergoing structural changes (new customs regulations, Brexit, the rise of populism,...), initially leading to an abyss of confusion and a violent sell-off.

The over-selling of 2018 is therefore, in our opinion, more the measure of the extent of this fear of changes in the rules. The performance of European markets in 2019 will therefore partly depend on clarification of this vague situation.

Given the low levels of valuation, we will probably see a recovery in the market before the publications in March, which risk being considered disappointing, due to:

- a 2018 Q4 that risks being difficult, notably concerning consumption
- the natural prudence of company managers in stating their prospects for 2019, which risk being badly interpreted,
- a market consensus that is still very high.

W WWW.CPR-AM.COM

Management Report (continued)

The first quarter of 2019 will therefore be a difficult period with risks of a "false start" even higher as we approach the date of Brexit.

In this context, as long as investors continue to expect rate increases, we think that recoveries will be "sold" by market players.

Concerning management styles, the winners in this new cycle cannot be the same as those of the previous cycle. Volatility, the big loser of the QE policy, should therefore continue to increase, while the gap between value and growth should reduce to the benefit of "value" securities. However, in case of a strong slowdown, the "growth" style will resume

Lastly, mid-caps (and especially growth mid-caps), which were the first victims of the sell-off at the end of 2018, are starting to reach attractive valuations. However, this market remains driven by flows and in the absence of the "incremental" investor, the asset class risks stagnating over the year.

In this context, the Sub-Fund's "quality securities" style should enable it to outperform its benchmark index. However, the Sub-Fund remains structurally with a low beta, which makes it under-perform in case of a steep rise in the market.

We will continue to aim for a 2019 dividend rate greater than 5%.

Management Report (continued)

CPR INVEST – GLOBAL SILVER AGE

In January, a trial of strength between the Democrats and the Trump administration took place on the theme of the budget. After one day of shutdown, the Republican majority voted in favour of a budgetary extension and promised to examine, in the near future, a system for the protection of the undocumented. At the international level, the American presidency changed its tone during the Davos summit, showing a more cooperative face. Trump gave a long presentation there of the tax reform, designed as a means of attracting jobs and capital to the United States. Janet Yellen, for her first chairmanship of the FED, left rates unchanged but give a warning on the probable rise of inflation in the forthcoming months. This improvement in confidence concerning inflation coincides in particular with the increase in growth expectations. The minutes of the last FOMC do not change the increasingly hawkish position of the Fed and the market is still expecting 4 rate increases this year.

From a macroeconomic point of view, in January, the inflation figures were higher than expected. Inflation rose by 0.3% over one month, driven by the rise in energy prices, bringing it to 1.8% in annual terms. However, GDP contracted slightly in the fourth quarter, standing at 2.6% against 3% expected.

In Europe, at the political level, four months after the last parliamentary elections, formal negotiations between the Conservative party of Angela Merkel (CDU) and the social Democrats (SPD) were finally able to begin after an agreement in principle was obtained between the two parties. However, the negotiations are expected to be difficult due to the fact that some of the Social Democrats consider that too many concessions were made to the Conservatives. Faced with the rise in the euro and the rapid improvement of the macroeconomic environment, all attention this month was focused on the first speech of the year by Mario Draghi. However, the chairman of the ECB did not change course and reaffirmed his policy on asset buybacks, as well as maintaining his main refinancing rate at zero. Despite this intervention, rates continued to tighten, as the market anticipated a less accommodating monetary policy.

Concerning the European economy, after 1.5% in November, harmonised inflation slowed in December 2017 to 1.4% on a year-on-year basis. GDP in the euro zone increased by 0.6%, as forecast, in the fourth quarter of 2017, and by 2.5% over one year.

As expected, the Bank of Japan kept its monetary policy unchanged. Neither did the BoJ consider it appropriate to revise its growth forecasts. Macroeconomic indicators remain pointing in the right direction. Monthly industrial production stood at 2.7% against 1.5% expected in January. Furthermore, retail sales grew by 3.6% versus an expected 2.1%.

On the foreign exchange market, the dollar lost ground against all the major currencies, with forex dealers being guided by budget and trade deficits. Concerning oil, it continued its rise, affected by the rebalancing of supply and demand caused by the decisions of OPEC at the end of November. Oil prices ended the month at \$64.06.

In January, the MSCI World index closed up by 1.48% in euros. The month was marked by the continuation of sectoral turnover, which implies tension on rates. Thus, the sector providing services to local authorities and the property sector are under-performing, unlike the financial sector, which is continuing its progress. Driven by the US tax reform and by an improvement in macroeconomic forecasts, the cyclical sectors such as discretionary consumption and technology show the strongest increases over this month.

Management Report (continued)

In this environment, the Sub-Fund outperformed the benchmark. The health equipment, financial savings and security sectors were the best positive contributors, while the leisure, personal care and automobile sectors weighed on relative performance.

Concerning the securities in the portfolio, Juno Therapeutics, Abiomed and Nihon M&A Center were the best contributors, while Imax, Thor Industries and Southwest Airlines contributed negatively to the relative performance of the Sub-Fund.

Transactions included, but were not limited to, purchases and/or reinforcements of lines such as Sothebys, Callaway Golf and Schroders Plc financed by sales/disposals of lines such as Imax Corp and Healthcare Trust of America Inc.

In February, Republican and Democratic senators concluded a budgetary agreement which plans to raise the ceiling on federal expenditure by around \$131 billion. In particular, it plans to allocate 20 billion over two years towards infrastructure expenses. Also, Jerome Powell took up his functions at the head of the FED. During his first speech, he showed great optimism, emphasising the robust economy, a subtle way of saying that he would be increasingly open to the possibility of raising rates four times this year. Lastly, Donald Trump announced that, from March, he wanted to tax imported steel and aluminium at respectively 25% and 10%. He detailed his thoughts on Twitter, stating that he wanted "intelligent, free and fair trade". The announcement was poorly received by the World Trade Organisation, which spoke of breaches of rules governing international trade.

From the macroeconomic point of view, the wage rise figures were higher than expected, causing a movement of panic, with the market anticipating a return of inflation higher than forecast. Inflation was up by 0.3% over one month, bringing it to 1.8% in annual terms, as forecast by the analysts. Lastly, the GDP proved in line with expectations, standing at 2.5%.

In Europe, at the political level, a formal agreement was found between the conservative bloc (CDU) of German Chancellor Angela Merkel and the social Democrats of the SPD. The latter obtained the ministries of Finance, Foreign Affairs and Justice. This access to some of the great offices of state, even though the Conservatives were in the lead in the elections last September, reflects the very unfavourable bargaining power of the Conservatives during these negotiations, "condemned" as they were to form this coalition. Also, during this month, these elections were marked by the resignation of the leader of the SPD Martin Schulz, following controversies arising from failure to respect his undertaking not to form part of the future government of Angela Merkel. Across the channel, negotiations resumed concerning the exit of the United Kingdom from the EU, notably to decide on the timetable for the transition period. A first "legal draft" was published at the end of February by the EU, which was immediately rejected by Theresa May following deep disagreement about the Northern Irish border. Lastly, concerning the ECB, the publication of the minutes of the meeting of 25 January showed no great surprises. Admittedly preoccupied by exchange rates, the ECB did not change its forecasts and still expects more marked signs of a resumption in inflation.

Concerning the European economy, the European Commission reviewed its growth forecasts upwards compared to Autumn 2017: 2.3% in 2018 and 2.0% in 2019 instead of 2.1% and 1.9%. Inflation should reach 1.5% in 2018 (against 1.4%) and 1.6% in 2019.

In Japan, macroeconomic indicators were mixed during February. Effectively, annual GDP stood at 0.5% against the expected 0.9%. Furthermore, retail sales slowed, at 1.6% against the expected 2.6%. The only positive point was the trade balance, which clearly exceeded expectations at 0.37T against a forecast 0.14T.

In the foreign exchange market, after three months of consecutive drops, the US dollar index rose in February. Concerning oil, due to worries about the strength of American production, it dropped by 5% over this month, closing at \$61.54.

Management Report (continued)

In February, the MSCI World index closed down by 3.72%. The month was marked by the continuation of sectoral turnover, which implies an increase in rates and the consolidation phase.

Thus, it will have been interesting to see that the defensive sectors did not outperform. In effect, in relative terms, the best sectors were technology, discretionary consumption and financials. Conversely, energy, the consumption of basic goods and real estate broadly under-performed the index.

In this environment, the Sub-Fund outperformed the benchmark. In February, the sectors of health equipment, personal care and automobiles were the best positive contributors, while the sectors of security, financial savings and dependency weighed on relative performance. Concerning securities in the portfolio, Paltac, Nihon M&A Center and Abiomed were the best contributors, while Fortune Brands Home & Security, Lowe's Companies and bioMerieux contributed negatively to the relative performance of the Sub-Fund.

Transactions included, but were not limited to, purchases and/or reinforcements of lines such as Hill-Rom, Sony and Bank of Montreal financed by sales/disposals of lines such as Daiwa House Industry, Juno Therapeutics and Henkel.

In March, the markets had much news to analyse, the most important being the possible trade war. At the beginning of the month, Donald Trump finally signed a text instituting tariffs on imports of steel and aluminium (exemptions possible depending on the country). In response, Gary Cohn, the President's main economic adviser, resigned. In his opinion, the increase in prices of goods produced in China will increase sales prices and therefore reduce the purchasing power of Americans. Fears remained in the background, as the wave of resignations continued at the White House, with that of the Secretary of State Rex Tillerson. He was judged as one of the final ramparts against the protectionist tendencies of Donald Trump. This imported inflation could also lead to greater rigour in terms of monetary policy.

Also, Jerome Powell, the Chairman of the Federal Reserve (Fed), successfully calmed the fears of investors. Admittedly, the growth forecasts for 2018 and 2019 were raised, but the scenario of three interest rate rises was not changed, according to him.

From a macroeconomic point of view, during March, the figures on non-farm job creation remained at high levels with 313K jobs created over the month. Inflation stabilised at 0.2% over the month, exactly at the level of the estimate. Lastly, GDP proved to be greater than expected, standing at 2.9% against an expected 2.7%.

In Europe, political risk reappeared in Italy with the general elections at the beginning of March. In spite of a structurally unstable system, the parties agreed to share the parliamentary bodies; the Senate going to Forza Italia and the House of Representatives to M5S. The formation of a government is still under negotiation. However, a coalition between M5S and the Northern League would be a victory for a Eurosceptic and protectionist political outlook. Concerning Brexit, the United Kingdom and the EU reached agreement on transition arrangements, thus opening the way for the start of trade negotiations. Concerning monetary policy, the European Central Bank (ECB) gave up its accommodating position concerning quantitative easing (QE) but does not seem in a hurry to normalise its monetary policy.

Concerning the European economy, inflation and wage growth in the Eurozone missed the forecasts of 10bps, standing respectively at 1.1% and 1.70%. Furthermore, the trade balance worsened at €19.9 billion against €22.6 billion that was initially expected.

In Japan, at its meeting of 8 and 9 March last, the Monetary Policy Committee of the Bank of Japan (BoJ) decided to retain the current framework of monetary flexibility. The economic indicators of March are positive, with annual GDP standing at 1.6% against 0.9% expected. Furthermore, household expenditure accelerated to 1.9% against an expected -1.1%. The only shadow was inflation, which was less than expected, at 0.8%, against 0.9% forecast.

Management Report (continued)

On the foreign exchange markets, following trade tensions, the US dollar index depreciated in March. Concerning oil, it was up by more than 5% over this month, closing at \$64.94.

In March, the MSCI World index closed down by 3.05%. The month was marked by continued sector rotation. Thus, it will have been interesting to see that the defensive sectors are resuming their bearish trend. Effectively, in relative terms, the best sectors were the utilities, real estate and energy. Unlike the financials, materials and IT broadly under-performed the index.

In this environment, the Sub-Fund outperformed the benchmark. In March, the sectors of health equipment, automobiles and leisure were the best positive contributors, while the sectors of financial savings, dependency and security weighed on relative performance. At the level of securities in the portfolio, 3 Inc, Renault and Vail Resorts were the best contributors, while Allscripts Healthcare Solutions, Bank of New York Mellon and AXA contributed negatively to the relative performance of the Sub-Fund.

Transactions include, but are not limited to, purchases and/or reinforcements of lines such as Cooper Inc, Clovis Oncology and Allegion financed by sales/disposals of lines such as Toro, T.Rowe and Christian Hansen.

In April, the results season began on good foundations: Until now, 401 American companies have published their financial statements, with an average revenue increase of +6.10%. At the level of world trade, the administration qualified its words and the struggle with China appears to be calming down. Concerning monetary policy, the Fed maintained its position on the continuation of normalisation, bringing down expectations of inflation from their high points in mid-February.

From a macroeconomic point of view, the drop in the dollar, the tax reform and the high price of oil are all elements that combine to support American growth. This resulted in quarterly GDP higher than expected at 2.3% annualised, against 2.0% expected.

In Europe, political instability in Italy continued, with the 2nd session of consultations on forming a government between the M5S movement and the Northern League ending in failure. The M5S would now seek an understanding with the Democratic Party (PD), which appears very divided on the question. Concerning Brexit, the House of Lords adopted an amendment giving Parliament the power to decide to remain in the EU if no agreement is found with Brussels. Lastly, concerning the European Central Bank, M. Draghi reiterated that there were still no convincing signs of an increase in underlying inflation and left European monetary policy unchanged.

Underlying inflation in April stood at 1% year-on-year for its third consecutive month, while industrial production dropped by -0.8% against -0.6% expected.

In Japan, Shinzo Abe, accused of favouritism in a call for tenders, is no longer seen as the best leader of the Conservative right according to the latest opinion polls. The economic indicators of April dropped slightly, with exports in annual terms standing at 2.1% against 4.7% expected.

In the foreign exchange markets, the rise in rates across the Atlantic, with the 10 year rate brushing the technical threshold of 3%, led to a rise in the dollar against all other currencies. Concerning oil, the price per barrel continued to climb, sustained by the persistence of geopolitical tensions in Syria. It was up by more than 5.6% over this month, closing at \$68.57.

In April, the MSCI World index closed up by 3.02%. Driven by the increase in raw materials, the energy sector had the best progress over this month, followed by the sectors of local authorities and discretionary consumption. The only sector that had negative performance over this month, basic consumption, significantly under-performed the index.

Management Report (continued)

In this environment, the Sub-Fund underperformed the benchmark. In April, the sectors of dependency, health equipment and personal care were the best positive contributors, while the sectors of leisure, security and pharmaceuticals weighed on relative performance. Concerning securities in the portfolio, Humana Inc, Texas Roadhouse and Becton Dickinson were the best contributors, while M3 Inc, Incyte Corp and Renault contributed negatively to the relative performance of the Sub-Fund.

Transactions included, but were not limited to, purchases and/or reinforcements of lines such as Service Corp, Agilent Technologies and Melia Hotels financed by sales/disposals of lines such as Legg Mason, Hyatt Hotels and ABN Amro.

In May, D. Trump blew hot and cold throughout the month. While the White House calmed isolationist fears, notably with China, the American president finally decided, at the end of the month, to maintain and apply tariff barriers on aluminium and steel to the whole of the rest of the world, while now threatening to attack the automobile sector. Also, he made the decision and left the Iranian nuclear deal, driving oil prices to their highest levels since November 2014. Lastly, cancelled and then put back on the agenda, the meeting between D. Trump and Kim Jong-un was finally intended to take place at the beginning of June, with the main issue being the denuclearisation of North Korea. Concerning monetary policy, sustained by a profitable economic environment, prudence gave way to confidence and the Fed's monetary tightening should continue with, as anticipated, an increase in rates by 25bps in June.

From a macroeconomic point of view, American growth in the first quarter was reviewed slightly downwards (2.2% annualised against 2.3% announced last month), while underlying inflation in April stood at 2.1%, down by 10bps compared to expectations.

In Europe, there was also plenty of news with the Italian and Spanish political instability. In Italy, the situation tended to improve at the beginning of the month, with M5S and the League finding common ground in order to form a government. Initially worried by the costly programme presented by the coalition, the president S. Mattarella opposed the appointment of a eurosceptic to the Ministry of the Economy, causing the resignation of the prime minister G. Conte, appointed a few days earlier. In this context, the Italian president then appointed a former director of the IMF C. Cottarelli while waiting for new elections. This decision was seen as an affront to the coalition, which then expressed its wish to remove the president. Faced with so many uncertainties, Italian rates tightened strongly, with the 10 year Italian spread even exceeding the level of 200bps. Finally, the coalition presented a new government more favourable to the EU – with the return of G. Conte at its head – thus distancing fears of an exit from the euro. Spain is not left out, with a corruption and misappropriation of Sub-Funds scandal within the popular party of the head of government M. Rajoy. The opposition put down a motion of no confidence against him, which would be voted on 1 June. While M. Rajoy risks being deposed, the socialist P. Sanchez is best placed for the position of prime minister if this happens.

Concerning monetary policy, following a slowdown in underlying inflation in April (0.7% year on year vs. +1% in March), prudence and patience are still appropriate within the ECB.

Note that the GDP of the Eurozone increased by 0.4% (in line with expectations) in the 1st-quarter 2018 according to the preliminary estimate of Eurostat, slowing sharply compared to its increase of 0.7% in the 4th quarter of 2017.

In Japan, discussions began with Russia concerning a peace treaty. Following a 70-year-old dispute over the Kuril Islands, no agreement had been officially signed between the two countries since the end of the Second World War.

From a macroeconomic point of view, in spite of an increase in Japanese wages in March (+2.1% vs. +1% the previous month), underlying inflation slowed and slightly disappointed in April, standing at 0.7%. Concerning GDP in the first quarter, this was negative and stood at -0.2%, a first for nine quarters, leading to a downward review of the forecasts for growth in 2018 for Japan (+0.9% instead of the expected 1.4%).

Management Report (continued)

On the foreign exchange market, the dollar index increased by +2.17%, helped by good figures on American growth and inflation, as well as by the yield on 10 year US rates, which climbed as far as 3.11% in mid-May. Concerning oil, the decision by D. Trump to leave the Iranian nuclear deal was beneficial for oil, with spot WTI reaching its monthly high on 21 May at \$72.26. However, following a turnaround in OPEC's strategy concerning a possible increase in its production, oil finished at \$66.8, at the same levels as the previous month.

In May, the MSCI World index closed up by 4.24% (in euros). Driven by good publications, notably from the GAFAs, the technology sector had the strongest increase over this month. What is more, driven by the increase in commodity prices, the energy and materials sector also outperformed. The only sector that had negative performance this month, the telecommunications sector, significantly under-performed the index.

In this environment, the Sub-Fund slightly underperformed the benchmark. In May, the sectors of medical equipment, pharmaceuticals and personal care were the best positive contributors, while the sectors of leisure, automobiles and financial savings weighed on relative performance. Concerning the securities in the portfolio, Align Technology, Abiomed and Lowe's Companies were the best contributors, while Thor Industries, Anima Holdings and Unum Group contributed negatively to the relative performance of the Sub-Fund.

Transactions included, but were not limited to, purchases and/or reinforcements of lines such as Siemens Healthineers, Thermo Fisher Scientific and CVS financed by sales / disposals of lines such as Ford, Anima Holding and Japan Airlines.

In June, in the United States, D. Trump will once again be the main driver of the news flow. The month began with the G7 and the attacks of the American president on Canada, thus strengthening the threat of a trade war. Subsequently, the historic summit between Kim Jong-un and Trump led to the promise of denuclearisation of North Korea. Also, Trump had first threatened China with customs tariffs of 10% on \$200 billion of imports, then the Europeans, proposing to put tariffs at 20% on imported vehicles. Until then, the hard line adopted by the Trump administration seemed to be an important and effective component of his negotiation strategy, with the aim of driving down the tariffs paid by American exporters.

From a macroeconomic point of view, American growth in the first quarter was reviewed slightly downwards (2.0% annualised against 2.2% announced last month), while underlying inflation in April stood at 2.2%, in accordance with expectations.

In Europe, there was also much news, with the focus of concerns being political instability. In Italy, the coalition government formed by the 5 Star Movement and the League was invested. The refusal to receive a ship carrying migrants and drifting off the Italian coast created a political crisis in Europe. Combined with tensions between the CDU and the CSU in Germany on the migration question, this crisis led to a European summit being held at the end of the month. An agreement was found after nine hours of debates and began a period of strengthening European external borders.

Concerning monetary policy, the ECB announced that it would not be buying any more bonds for purposes of QE from the end of the year.

Note that inflation in the Eurozone stood at 1.9% annualised (in line with expectations) this month, slightly up compared to the 4th quarter 2017.

Although marginalised in the process which led to the summit between Kim Jong-un and Donald Trump, the Prime Minister, Mr Abe finally and reluctantly congratulated the "*courage*" of Mr Trump in meeting the North Korean leader.

From a macroeconomic point of view, the monthly data concerning GDP (-0.6% in the first half-year) marked the end of the longest period of growth since 1989.

On the foreign exchange markets, the dollar index remained stable, helped firstly by good American growth and inflation figures and weakened by the threats of trade wars. Concerning

Management Report (continued)

oil, the threat of a drop in production in Iran and Venezuela drove a spot WTI to \$74.31, an increase of 12.7% over the month.

In June, the MSCI World index closed down by 0.07% (in euros). Driven by a more defensive market, the basic consumption sector made the most progress this month. Furthermore, thanks to sectoral turnover, the sectors of services to local authorities and real estate also outperformed. However, financials, industrials and materials performed negatively over this month.

In this environment, the Sub-Fund outperformed the benchmark. In June, the sectors of medical equipment, leisure and dependency were the best positive contributors, while the sectors of financial savings and automobiles weighed on relative performance. Concerning the securities in the portfolio, Vail Resorts, Straumann and Becton Dickinson were the best contributors, while Carnival, Nihon M&A and Allscripts contributed negatively to the relative performance of the Sub-Fund.

Transactions include, but are not limited to, purchases and/or reinforcements of lines such as CVS, Sonova and Allergan financed by sales/disposals of lines such as Aegon, Credit Suisse and Texas Roadhouse.

July was a positive month, in spite of threats from Washington to tax Chinese products, with a potential amount of new taxes of \$200 billion. The US Federal bank tried to provide reassurance by stating that the effects of the protectionist policy would not harm the strength of American growth. From a macroeconomic point of view, the American economy grew by 4.1% at an annualised sequential rate in Q2-2018, in line with optimistic expectations.

In Europe, the negotiation between Juncker and Trump defused the risk of a trade war. Customs tariffs on European cars were ruled out and visibility on the trade relations between the two powers improved. Concerning monetary policy, the ECB maintained its policy and stated that base rates would remain unchanged until the summer of 2019. On the macroeconomic side, the first quarter saw a contraction of activity. The growth in GDP should reach +2.2% in annualised terms, mainly explained by the lower contribution of exports.

The Bank of Japan did not change course even though it reviewed its inflation forecasts downwards over the next three years. From a macroeconomic point of view, monthly industrial production was very disappointing, standing at -2.1% against an expected -0.3%.

On the foreign exchange markets, the dollar index remained stable although volatile. Concerning oil, the forecasts of OPEC and the loosening of American sanctions against Iran, drove spot WTI to \$68.38, representing a drop of -7.13% over the month.

In July, the MSCI World closed up by 2.90% (in euros). Driven by a more defensive market environment, the health sector made the most progress over this month. Furthermore, thanks to sectoral turnover, the financials and industrials sectors outperformed also. However, real estate, discretionary consumption and materials had relative negative performance over this month.

In this environment, the Sub-Fund underperformed the benchmark. In July, the sectors of dependency, health and security were the best positive contributors, while the sectors of health equipment and leisure weighed on relative performance. Concerning securities in the portfolio, IQVIA, Edenred and Southwest Airlines were the best contributors, while Nevro Corp, Husqvarna and Abiomed contributed negatively to the relative performance of the Sub-Fund.

Transactions include, but are not limited to, purchases and/or reinforcements of lines such as Abbott, Allergan and Comcast financed by sales/disposals of lines such as Hill-rom, Becton Dickinson and Blackrock.

In August, international trade was still the focus of all discussions. The United States and Mexico concluded an agreement in principle, still subject to finalisation and implementation,

Management Report (continued)

aiming to strengthen North American manufacturing trade and to enable the growth of the American and Mexican economies. Concerning tensions with China, the Chinese delegation came to the United States to negotiate with the members of the treasury secretariat but returned without any major progress being made. Concerning the Fed's monetary policy, J. Powell, during the Jackson Hole symposium, confirmed that if the American economy remained vigorous, he would not hesitate to continue gradual rate rises. From a macroeconomic point of view, the American economy grew by 4.2% at an annualised sequential rate in Q2-2018, a little above expectations that were already optimistic.

In Europe, the last aid programme in favour of Greece came to an end, the largest programme of financial assistance to a state in history. In August 2015, the members of the European Stability Mechanism (ESM) agreed on an aid programme of €86 billion over 3 years, to recapitalise the banks and finance the state. Finally, €61.9 billion out of 86 will have been used. At the political level, Europe appears divided concerning the solutions to the problems of migration, a subject which could become the main topic of elections which take place in 9 months.

On the macroeconomic side, the second quarter saw a resumption in activity, notably thanks to the trade balance, which stood at + €22.5 billion against an anticipated €18 billion. Growth in GDP reached +2.2% in annualised terms in Q2, above the 2.1% that was initially forecast.

In spite of the monetary tightening, the European and American central banks and the BoJ, through the intermediary of its governor H. Kuroda, stated that they had no intention to raise rates as long as uncertainties about growth remained.

From a macroeconomic point of view, GDP recovered slightly, standing at 0.5% against the expected 0.3%.

On the foreign exchange markets, the dollar index moved downwards after its high point on 15 August at 96.92, closing the month by dropping to 95.11. Concerning oil, in spite of a few slight fluctuations during the month, spot WTI remained stable at \$68.38, representing an increase of 0.6% over the month.

In August, the MSCI World index closed up by 1.85% in euros. The health and IT sectors had the strongest increase over this month. Following them, the discretionary consumption and real estate sectors also outperformed. However, energy, materials and financial had relative negative performance over this month.

In this environment, the Sub-Fund outperformed the benchmark. In August, the sectors of health equipment, dependency and leisure were the best positive contributors, while the financial savings and security sectors weighed on relative performance. Concerning the securities in the portfolio, CVS, Callaway Golf and Centene were the best contributors, while Sotheby's, Fortune Brands and Ping Healthcare contributed negatively to the relative performance of the Sub-Fund.

Transactions include, but are not limited to, purchases and/or reinforcements of lines such as Roche, Cigna and ADT Inc, financed by sales/disposals of lines such as KKR, Securitas and Husqvarna.

In September, the Fed continued to increase its interest rates, reaching 2.25% (the highest rate for the last 10 years). Another increase is expected for the end of the year and three others for 2019. According to Powell, the reasons for this increase are a vigorous American economy (3.1% GDP growth forecast for 2018), low unemployment rates and wage increases with low and stable inflation. The Fed predicts GDP growth of 1.8% for 2021, and an inflation rate of 2.1%. This rates increase was largely anticipated by investors.

The return of fears of a trade war are oppressive. The United States increased customs tariffs on \$200 billion of Chinese products. The import tariff is 10%, then will be 25% from 1 January 2019. China responded by applying a tax of 25% on \$60 billion of American products. Trump plans to increase import tariffs on Chinese products to which they are still not applied.

Management Report (continued)

This had a significant impact on the emerging markets index and on the securities of companies with operations in developing countries.

In Europe, under the pressure of the 5 Star movement and the League, the Italian Finance Ministry proposed a budget based on a public deficit of 2.4% of GDP, well above what was initially planned (less than 2% of GDP). The announcement led to falls in value in the financial sector. However, European markets closed the month on a positive note. Indeed, looking at the results of Q2, the performance of European companies was positive, notably driven by good prospects for profitable growth.

In September, the MSCI World index closed up by +0.77%, driven essentially by the energy, industry and health sectors. In contrast, financials, real estate and basic services to local authorities broadly under-performed.

In this environment, the Sub-Fund outperformed the benchmark. Health equipment, personal care products and dependency were the sectors that contributed positively, while the sectors of leisure, pharmaceutical laboratories and automobile weighed on relative performance. In terms of securities in the portfolio, Edwards Lifesciences Corporation, Asahi Intecc Co and Cigna Corporation were best contributors, while Thor Industries, Nevro Corp and Melia Hotels International contributed negatively to the performance of the Sub-Fund.

Amongst the movements in the portfolio, we emphasise the purchases/strengthening of lines such as Allianz, National Vision and UBS financed by sales/disposals of lines such as Smiths Group, Allegion and Allscripts Healthcare.

In October, the stock markets underwent a period of extreme volatility and strong sectoral turnover. During the month, the MSCI World index lost more than 5%, notably due to continuation of trade tensions between the United States and China and new political uncertainties in Europe:

In Italy, the Italian government presented a budget plan to the European Commission, which provided for a deficit increased to 2.4% of GDP in 2019. The Commission rejected this proposal and requested revisions to it. Moody's downgraded Italian sovereign debt by one notch; however, Fitch and Standard & Poor's maintained their investment rating.

Concerning Brexit (deadline for the negotiations 29 March 2019), the October summit between the EU and the United Kingdom was not successful, due to the lack of a solution concerning the border between Northern Ireland and the Republic of Ireland.

In Germany, after the electoral defeat of the CDU in Hesse, Angela Merkel decided that she would leave the chairmanship of the party at the end of her term of office in 2021.

At the same time, a reduction by the IMF in its worldwide growth forecasts also contributed to increasing the risk aversion of investors (+3.7% expected this year and next year, representing 0.2 percentage points less than previously).

However, in the United States, GDP growth in the third quarter (+3.5% at an annualised rate) exceeded forecasts of 3.3%; wages leapt by more than 3% for the first time in 10 years, in a very profitable context of job creation (unemployment rate at 3.7%). The PCE underlying inflation index nevertheless remained controlled at 1.9%.

In the emerging countries, the Chinese slowdown, caused by trade tensions with the United States, became more apparent, as shown by the drop in the Caixin index in October, at its lowest level since January 2016.

The third quarter profit publication season reached its high point, with nearly 83% of companies of the S&P 500 having published. Until now, results have greatly exceeded the expectations of analysts, particularly in the sectors of energy, technology and discretionary consumption (retail sales over the Internet). 69% of companies beat expectations concerning net earnings per share,

Management Report (continued)

56% beat expectations on revenue and 46% beat both. The results in the United States were much more sound than in Europe (the lowest for five years).

In October, the MSCI World index lost 5% (in euros). At the sectoral level, we saw notable turnover in defensive sectors with telecommunication services and services to local authorities performing best, while more cyclical sectors such as information technology and industry suffered pressures. Growth securities and small caps suffered even more.

In this environment, the Sub-Fund under-performed its benchmark index. The sectors of dependency and pharmaceuticals contributed positively to relative performance, while financial saving, leisure and health equipment weighed on performance.

Security by security, Comcast, Merck & Co and Cigna Corp were the best contributors; Southwest Airlines, M3 and Align Technology contributed negatively to the performance of the Sub-Fund.

Amongst the portfolio movements were new/reinforced positions such as Takeda Pharmaceuticals, Becton-Dickinson and Sanofi financed by sales of Fortune Brands, Cooper Cos Inc and Sothebys.

In November, the results of the American mid-term elections (the Democrats taking control of the House of Representatives and the Republicans retaining a majority in the Senate) were anticipated by the markets. During this time, trade tensions between the United States and the rest of the world were still in the news, with hopes of agreements and contradictory news.

In the United Kingdom, an agreement on Brexit was concluded with Theresa May's government, but the vote in the House of Commons (mid-December) appears to be a difficult battle. In Germany, economic growth continues to slow due to difficulties with the automobile industry. Tensions between Italy and the European Commission remain after the rejection of its budget proposal. Italy has only two options: modify its budget to comply with European requirements or be faced with an "excessive deficit procedure".

China reacted to tensions with the United States by launching a new series of fiscal stimulus measures for 2019.

Mexico was downgraded by Fitch, due to uncertainties concerning the policies of the current administration.

In November, the MSCI World index increased by 1.21% (in euros), driven by defensive sectors such as health and telecommunication services, as well as a recovery in industrial and financial securities. However, the information technologies and materials sectors were in difficulties.

In this environment, the Sub-Fund outperformed its benchmark index: pharmaceutical (Merck, Roche Hldgs), health (Agilent, Danaher) and leisure securities (Carnival Plc, JetBlue Airways) provided the best contributions, while security (Eurofins Scientific) and automobile weighed on relative performance.

During this period, dependency (Anthem, Alexandria Real-Estate) and pharmaceutical (Sanofi, Allergan) securities were strengthened while positions in leisure activities (Southwest Airlines, Thor Industries) and financial saving (Northern Trust, Carlyle) were reduced.

In December, geopolitical events and fears of a worldwide economic slowdown in 2019 continued to dominate the financial markets with the MSCI World index closing down by 8.48% in euros. Rates are dropping strongly with volatility remaining above its 5-year average.

In the United States, the monetary tightening established by the chairman of the Fed, Jerome Powell, weighed on the performance of the markets. The Fed nevertheless decided to reduce its anticipated rises for 2019 from three to two. Furthermore, the trade war seems to be subsiding

Management Report (continued)

with agreements in principle and the announcement of lowered tariffs on the import of American cars. But the arrest of the CFO of Huawei in Canada and the request for extradition by the US have revived tensions.

In Europe, the economic slowdown remained the focus of concerns with the adjustment of growth forecasts by the ECB in the Eurozone to 1.7% for 2019 (vs 1.8%). The uncertainties around Brexit weighed on European markets, with the vote on the agreement in the Commons finally pushed back to mid-January by Theresa May. However, the tensions related to Italy seem to be gradually dissipating following the revision by the Italian government of its public deficit target for 2019 (to 2.04%). The "yellow vests" crisis in France and the announcement of new measures to boost purchasing power by Emmanuel Macron weighed on the markets. Lastly, Chinese growth was down following the repercussions of the trade war and a drop in exports.

In December, the MSCI World index closed down by 8.48% in euros. The sectors of services to local authorities, real estate and materials were the best contributors. Conversely, penalised by the sectoral turnover, financials, technology and health weighed negatively on performance.

In this environment, the Sub-Fund under-performed the benchmark. In December, the sectors of HPC, automobile and security were the best contributors, while leisure, pharmaceuticals and healthcare equipment contributed negatively. Concerning securities in the portfolio, Japan Hotel Reit, Kose Corporation and Straumann were the best contributors, while Aramark, CVS and Carnival were the least good.

Amongst the portfolio movements were new/reinforced positions such as Baxter, Sanofi and International Consolidated Airlines financed by sales of Crédit Agricole, Cerner and Bank of NY Mellon.

Outlook for 2019

In 2019, in spite of worries about the development of trade and American monetary tightening, we anticipate positive global economic growth, notably in the first half year; the risks of a recession in the United States remain low out to 2020.

In spite of a "peak" of profits in 2018 for the companies of the S&P 500 (following the tax reform), the recent drop in commodity prices (particularly oil) and the controlled rise in wages should enable company profits to be maintained upwards by 6 to 8% in 2019.

At the same time, the recent drop in the markets, following the cessation of accommodating monetary policies and the resurgence of political risks, brought stock-market valuations back to reasonable levels in the major investment zones.

In this context, stock markets are likely to benefit from a significant recovery in case of good news: Sino-American trade agreements, pause in the increase in the Fed Sub-Funds rate, "soft Brexit",...

The start of the year should nevertheless remain weighed down by the publication of mediocre results (fourth-quarter), very prudent prospects for 2019 from company managers and continued erosion of 2019 results estimates. Volatility, highly influenced by the end of QE and fears of massive buybacks, should remain high.

For this reason, we prefer securities that are less volatile and more liquid and maintain the defensive profile of the portfolio through securities in:

- Pharmaceuticals (large caps), which benefit from the launch of new products, from the reduction in patent losses and attractive relative valuations; due to the risks on prices in the United States, we are selective (Merck, Sanofi, Allergan, Roche).
- Dependency, due to the visibility of revenue (acceleration of the number of Medicare & Medicaid beneficiaries) and price discipline (Centene, Humana, CVS/Aetna, etc.).

Management Report (continued)

- Medical equipment (large caps): with diversified companies benefiting from the launch of new products (Abbott, Medtronic, etc.) and/or high recurrent revenue from consumables (Baxter, Becton Dickinson, Thermo-Fisher, etc.).

At the same time, we are continuing to be highly selective in securities in the leisure sector, due to the negative impact of new customs tariffs and the increase in costs of labour and freight on margins. We prefer companies with good visibility on their revenue (volume and price) and ability to improve their margins (Comcast, Charter, Carnival, Aramark, IAG, Alaska Airlines,...).

Lastly, we remain less exposed to the sectors:

- Automobile: little visibility on final demand and margins too high.
- Well-being: little visibility on volumes, pressure on prices and margins, vulnerable valuations.
- Security: pressure on prices and margins (increase in labour costs), valuations relatively high.
- Financial savings: in an unfavourable interest-rate environment (flat rate curves), we prefer life insurers (resilient growth in premiums, increase in yield from equity capital, sound dividends) to the detriment of wealth managers confronted with difficult financial markets (lower yields / increased volatility).

Management Report (continued)

CPR INVEST – GLOBAL DISRUPTIVE OPPORTUNITIES

In January, the stock markets began 2018 by continuing the upward movement of the final weeks of 2017. In January, the MSCI World index was up more than 5% (in dollars) in a month that was overall very favourable to the asset class. In sectoral terms, the increase was once again led by the cyclical sectors, notably discretionary consumption, technology and financials. However, the "services to local authorities" sector lagged behind. The American market outperformed, boosted by the still positive sentiment of investors with regard to president Trump's tax reform, combined with the persistent weakness of the greenback, which is a factor supporting profits. Even so, the European market was up 1.6%.

Faced with the rise in the euro and the rapid improvement of the macroeconomic environment, all attention this month was focused on the first speech of the year by Mario Draghi. However, the chairman of the ECB did not change his guidelines and reaffirmed his policy on asset buybacks. Despite this intervention, rates continued to tighten, as the market anticipated a less accommodating monetary policy. The euro continued its rise against the dollar, leading to under-performance of European stock markets in relation to the other main world markets.

In January, the Sub-Fund slightly outperformed the MSCI World index, notably supported by the acquisition of Juno Therapeutics by Celgene for \$9 billion (premium of 90%), with the aim of strengthening its activities in the treatment of blood cancer. Juno is currently working on a CAR-T therapy for non-Hodgkin's lymphoma and aims to obtain regulatory approval in 2019. The security has been one of our main convictions in the theme of immuno-oncology since the launch of the Sub-Fund. We think it is highly probable that we will see the appearance of a greater number of targeted medicines, given that the cost of DNA sequencing is strongly down. We reorganised the exposure of the Sub-Fund in immuno-oncology: the position on Roche, for which progress on this subject has turned out to be below our expectations, was reduced. Two new positions were initiated on the theme with Merck & Co, the new leader in the PDX market (xenograft derived from the patient's tumour), and on Bluebird Bio. The latter is concentrating on a different protein than Juno and hopes to become a multi-product franchise, notably with four approvals expected in 2018.

At the beginning of the month, security breaches on processors were discovered. Named Meltdown and Spectre, these attacks enable the pirating of data stored in the cache memory of processors. The Sub-Funds were not directly exposed to the companies associated with this controversy, either on semiconductors or software. This strengthens our conviction on Advanced Micro devices, which is at the beginning of an important product cycle. Lastly, in China, record sales of electric vehicles were reached in December 2017, with nearly 100k sales over the month, representing an increase of 120% year-on-year. This sends a clear upward signal concerning the market for electric/autonomous vehicles and shows that adoption is faster than forecast by Chinese consumers.

We are continuing to favour the mid-caps segment due to their significant potential for appreciation over the next 12 months. Concerning valuations and levels of growth, our sectoral preferences are focused on storage and energy, as well as virtual and augmented reality and the YieldCos. Conversely, the "smart factory", medical technologies and Internet-of-Things (IoT) sectors appear as the least attractive.

February was negative for European stock markets, which quickly lost the gains that they saw in January. The MSCI World index closed down by more than 4% on the month (in dollars) in February. The turbulence of the beginning of the month reminded investors that the market was never safe from a sharp and rapid correction.

In this environment marked by the sudden rise in volatility, which subsequently fell, it was interesting to observe the sectoral performance. In such a correction phase, it is natural to wait for good performance of the most defensive sectors, supported by the appetite of investors for

Management Report (continued)

safe-haven stocks. In the volatile markets of February, it is the opposite which took place, with outperformance of technology, discretionary consumption and financial securities, while the more defensive sectors, such as real estate and basic consumption, lagged behind. At the regional level, the drop was quite consistent. Europe lost 3.5%, while the United States and Japan both dropped by 3.7% (performance of the MSCI indices in local currency).

The Sub-Fund outperformed the MSCI World index in February, firstly in the correction, then in the recovery. The key factor in the performance was the exposure to mid-caps and a good results season for shares exposed to a disruptive trend. The main contributors to the performance were: Criteo following its recovery, thanks to the growth in revenues (finally less affected by Apple's ITP functionalities); SolarEdge, in our "Earth" dimension, which continues to publish spectacular results showing gains in market share in power optimisers and photovoltaic converters. Lastly, Twilio, a cloud communication platform classed in the "digital economy", continues to show strong acceleration of its activities in the context of Uber's transition.

Qualcomm increased the price of its offer for NXP Semiconductors from \$110 to \$127.50 per share in cash, and concluded restrictive agreements with nine shareholders, including some of the activists (which included Elliott Advisors, Soroban...), collectively representing 28% of the outstanding shares. The approval threshold was also officially lowered from 80% to 70%.

In the "Earth" dimension, we are not really surprised by the news that Fiat-Chrysler Auto intends to abandon most diesel engines in tourism vehicles by 2022, a major decision for a company whose European division consisted of at least 35% diesel in 2017.

In February, we sold the securities that were trading above our price objectives: Juno Therapeutics, New Relic and Abiomed. We also significantly increased exposure to the "Digital Economy" via the cyber-security theme, with the introduction of two new names: Sophos (encryption solutions) and Qualys (management of vulnerabilities). In the FinTech theme, we initiated TransUnion: it supplies data on consumer credit and analyses to companies, which helps them to determine the solvency of potential borrowers.

We are continuing to favour the mid-caps segment due to their significant potential for appreciation over the next 12 months. Given the valuations and levels of growth, our sectoral preferences were focused on the YieldCos, AR/VR and 3D printing. On the other hand, the Cloud, MedTech and the IoT appear less attractive.

In March, after a promising start to the year, stock markets trended downwards. The MSCI World index lost 1.2% over the first three months (in \$) of 2018. March was particularly trying. The fears of a trade war and pressures on technology stocks weighed on markets and led to a drop of 2% (in \$) for the MSCI World index. The return of peaks of volatility was accompanied by sectoral turnover, with the more defensive market segments gaining ground at the expense of more cyclical sectors. The drop in bond yields and flattening of rates curves penalised financials. The protectionist measures announced by president Trump affected the American market, which under-performed Europe and emerging markets.

However, over the quarter, it was the American market which showed the most resilience amongst the developed markets, recording a drop of less than 1%, while Europe lost more than 4% and Japan lost about 5%, penalised by the appreciation of the yen (performance in local currency).

From a micro-economic point of view, the news over the last month was marked by the scandal related to the exploitation of private data by Cambridge Analytica, recovered through the intermediary of the social network Facebook. This restarted the debate on the new General Data Protection Regulations (GDPR) and their potential implications for platforms such as Google or Facebook. What types of changes must be made to be in compliance with this new directive, and what is the impact going to be on their business model?

asset
management

T 01 53 15 70 00

W WWW.CPR-AM.COM

Management Report (continued)

In spite of a difficult market environment this month, the Sub-Fund outperformed the MSCI World index.

The relative performance was driven by the good selection within securities of the "Cloud" segment (Nutanix and Twilio) and medical technologies through Edward Lifesciences.

In March, we took profit on two values which were trading near to our price objective, in this case Nutanix and Twilio. We initiated Universal Display, a leader in OLED materials and intellectual property within the digital economy sector.

Following the latest market consolidation, we are now seeking a good entry point to the large caps and particularly in the technology sector, where the valuation is now much more attractive. Given the valuations and levels of growth, our sectoral preferences are focused on energy efficiency, wind power, AR/VR and 3D printing. On the other hand, immunotherapy, the Cloud and medical technologies appear the least attractive.

April was positive for the stock markets with the MSCI World index increasing by more than 1% in dollars. In sectoral terms, the recovery was quite generalised, with nine of the eleven sectors of the MSCI closing the month upwards. The sectors of energy, services to local authorities and discretionary consumption had the best performance of the month, while basic consumption and industry under-performed the market. In geographical terms, the American market lagged behind. The strength of the greenback led to a clearer recovery in Europe and Japan, which had respective gains of more than 4.5% and 3.5% (MSCI indices in local currency, dividend reinvested).

The rising rates across the Atlantic, with the 10 year rate brushing the technical threshold of 3%, resulted in the rise in the dollar against all other currencies. The price of oil continued to rise, sustained by persistent geopolitical tensions in Syria. Brent increased by 7% over the month, to close just above \$75.

In April, the Sub-Fund under-performed the MSCI World index in a very difficult market environment, where the American stock-market under-performed compared to other markets – developed and emerging –, where the dollar recovered and where oil reached its highs over several years.

Concerns related to the trade war continue to affect part of our exposure: the Chinese regulatory authorities again requested Qualcomm to present its file on the acquisition of NXP Semi; Acacia Communication, the company that performed least well in the theme of Big Data, dropped by 30% when the American trade ministry refused export privileges against ZTE.

Life sciences and health were one of the main negative factors in the performance.

Incyte announced the cessation of the study on a new immunotherapy medicine: Epacadostat on the IDO inhibitor had not worked in conjunction with the star medicine of Merck, Keytruda.

In April, we continued to take profit on Nutanix and Twilio. We also reintroduced Marvell Technology in the Sub-Fund; we are approaching the end of the period of closure for the merger with Cavium, which we held previously.

May will be a critical month to generate performance when 2/3 of the securities in the portfolio publish their quarterly results.

We are continuing to seek points of entry to large caps and more particularly into the technology sector, because valuations are now much more attractive.

Given the valuations and levels of growth, our sectoral preferences are focused on energy efficiency AR/VR, 3D printing and biotechnology. However, solar, immunotherapy, drones and medical technologies appear the least attractive.

In May, the MSCI World index slightly increased by 0.6% (in dollars), in spite of the resurgence of growing political risk in Italy, which caused a peak in volatility and a rise in risk

asset
management

W WWW.CPR-AM.COM

Management Report (continued)

aversion. At the regional level, the United States clearly outperformed, with the S&P index gaining more than 2%, while Japan and Europe held back.

At the start of the month, the combination of sound results and a calming of worries concerning the trade war between the United States and China sustained stock markets. However, this more positive momentum stopped sharply on 27 May when the designated Italian prime minister, Giuseppe Conte, renounced his mandate to form a government. This reminded us that until the finalisation of budgetary integration and policy in the Eurozone, political risk can suddenly reappear, which can affect general sentiment. Over the last days of the month, the nervousness in Italy reduced following the agreement of the populist parties to form a government, but the situation in the markets was not favoured by the deterioration of the political environment in Spain.

In May, the MSCI World index outperformed, notably thanks to the "digital economy" dimension, combined with exposure to mid-caps (Wayfair, Twilio, Ellie Mae) and to few securities that under-performed.

During the month, we continued to take profits on Nutanix and Temenos. We also continue to increase exposure to Marvell Technology.

After the strong performance of mid-cap securities, we continue to seek entry points to the large caps and particularly in the technology sector, because the valuations are now much more attractive.

Given the valuations and levels of growth, our sectoral preferences are focused on energy efficiency, wind power, electrification, autonomous vehicles and biotechnology. However, precision agriculture, drones, cyber security and the cloud appear the least attractive.

During June, in spite of periods of volatility mostly attributable to trade tensions between the United States and its main economic partners, the MSCI World index recovered strongly in the second quarter, up by 3% (in USD). At the regional level, performance remained highly unsystematic. The United States had the best performance, with the S&P 500 increasing by nearly 6%. Europe increased by about 4%, while Japan, up by 1.5%, under-performed the world index (performance in local currencies).

In the United States, D. Trump will once again have been the main driver of the news flow. The month began with the G7 and the attacks of the American president on Canada, thus strengthening the threat of a trade war. Subsequently, the historic summit between Kim Jong-un and Trump led to the promise of denuclearisation of North Korea. Also, Trump had first threatened China with customs tariffs of 10% on \$200 billion of imports, then the Europeans, proposing to put tariffs at 20% on imported vehicles. Until then, the hard line adopted by the Trump administration seemed to be an important and effective component of his negotiation strategy, with the aim of driving down the tariffs paid by American exporters.

In Europe, there was also much news, with the focus of concerns being political instability. In Italy, the coalition government formed by the 5 Star Movement and the League was invested. The refusal to receive a ship carrying migrants and drifting off the Italian coast created a political crisis in Europe. Combined with tensions between the CDU and the CSU in Germany on the migration question, this crisis led to a European summit being held at the end of the month. An agreement was found after nine hours of debates and began a period of strengthening European external borders.

The Sub-Fund slightly outperformed the MSCI World index in June, an unusual month characterised by two weeks of strong performance, followed by a strong dip, ending the month in negative territory.

CS 61595
75730 PARIS CEDEX 15

T 01 53 15 70 00

W WWW.CPR-AM.COM

Management Report (continued)

The main driver of performance was the "digital economy" dimension, driven by the performance of Criteo (no significant impact of the new GDPR regulations and diversification of sources of revenue), Globant (investment of 16% of the capital by WPP, one of the most promising leaders in the digital and cognitive revolution in Latin America) and by Wayfair (successful establishment of a B-to-B programme and an affiliation programme of the Amazon Prime type: MyWay). The performance of the "Earth" dimension continues to be disappointing, particularly concerning the exposure to solar and wind power following the change of pricing policy in China.

In June, we began to reorganise the exposure in certain themes, taking profits on securities with good valuations: Axiom, Gartner and Everbridge. In the theme of electric vehicles, BYD was sold due to the worsening of visibility: a more difficult competitive landscape and announcements about reduction of subsidies.

First Solar was introduced on the solar theme; the company is a leader in cost control with one of the best efficiency rates and we do not expect market disruption through Chinese oversupply this year or the renegotiation of the prices for long-term contracts.

Our objective is to rebalance the Sub-Funds towards the "Earth" and "Life sciences" dimension, taking profit in the "Digital economy" dimension.

Given the valuations and levels of growth, our sectoral preferences are focused on energy efficiency, wind power, solar electrification and autonomous vehicles. On the other hand, medical technologies and online commerce appear as the least attractive.

July ended on positive performance for the stock markets. The MSCI World index was up by more than 3%. At the regional level, Europe and the United States performed well, adding more than 3%, while Japan lagged slightly behind.

The trade war continued to make the headlines, with the fear that the growing tensions between the United States and the rest of the world might lead to stagnation in investment and a slowdown in the growth of exports. The threats have reduced over the last few weeks after the American president Trump and the president of the European Commission, Jean-Claude Juncker, found an agreement to avoid the imminent trade war with Europe.

The second quarter results season is also worth particular attention. At the geographical level, the situation is mixed, with sound results coming from the United States until now, while Europe is down.

The Sub-Fund under-performed the MSCI World index in the last days of July, suffering from a difficult quarterly results season in the digital economy (Sophos).

In July, we are continuing to rebalance the Sub-Fund in favour of the Earth, Health & Life Sciences dimension, taking profit in the digital economy (Facebook, Temenos). TPI Composites was introduced in the theme of wind energy. TPI is the largest independent manufacturer of composite wind turbine blades.

August is generally a quiet month for the stock markets, but this year was different. World stock markets saw gains of about 1%, after having dropped nearly 2% earlier in the month. At the regional level, Europe is down, dropping about 2%, while the United States outperformed with an increase of 3% (in local currency). Worries about the potential repercussions of a trade war led by the United States combined with geopolitical tensions in Turkey caused a slight increase in volatility at the beginning of the month. Other than the global geopolitical situation, the fundamentals appear sound overall: encouraging recent publications of economic growth indicators and a satisfactory results season. The BPA momentum remains on an upward trend, with robust worldwide activity and a weaker euro, which should sustain profits towards the end of the year.

In this environment, the Sub-Fund strongly outperformed the MSCI World index. The digital economy dimension was the main driver of performance. This included the performance of AMD, thanks to the transition towards 7 nm, and the Cloud theme with Twilio, Nutanix and Ultimate Software.

Management Report (continued)

In August, we gradually increased exposure to the Life Sciences and Health and the Earth dimensions, to reduce our exposure to the Digital Economy. We are continuing to increase our position on Blue Bird and have initiated Mirati Therapeutics. Lastly, we participated in the initial public offering of Bloom Energy, in the Earth dimension, which provides solid oxide fuel cells. In our classification, the best classified themes are energy storage, wind energy and electric vehicles and autonomous driving.

In September, world stock markets saw gains of about 0.5% over the month, bringing gains in the third quarter to more than 5% (in USD). At the regional level, during the third quarter, the United States maintained its lead with the S&P 500 up nearly 8%, Japan added more than 5% and Europe a little more than 1%. Worries concerning the potential repercussions of a trade war led by the United States combined with geopolitical tensions in Turkey and an uncertain political context in Italy caused concerns during the quarter. Other than the global geopolitical situation, the fundamentals appear sound overall: encouraging recent publications of economic growth indicators and a satisfactory results season. The BPA momentum remains on an upward trend, with robust worldwide activity and a weaker euro, which should sustain profits towards the end of the year.

The European Parliament voted in favour of the controversial directive on copyright which updated copyright laws for better adaptation to today's Internet. Apple's fleet of self-driving cars increased by 27% since May, to reach 70 vehicles authorised for road tests.

Scientists in the University of Stanford finalised a method of forecasting the risk of abdominal aortic aneurysm (AAA) through machine learning. Lastly, the 2018 Nobel Prize for medicine was awarded jointly to James P. Allison et Tasuku Honjo for the theory on the treatment of cancer by inhibition of negative immune regulation.

In this environment, the Sub-Fund under-performed the MSCI World index. All dimensions contributed negatively to the performance, notably with Nutanix in the Big Data theme, SolarEdge in solar and Clovis in immuno-oncology.

There were few movements in September: Fanuc and Ctrip were sold due to macroeconomic uncertainty around the trade war. DocuSign was initiated in the Cloud theme. They provide a solution for digitising the agreement process, supplying advanced security and audit trails.

In our classification, the best classified themes are digital marketing, e-commerce, energy efficiency and biotech.

Stock markets underwent a period of high volatility and sectoral turnover in October. During the month, world stock markets lost more than 7% (in USD). At the regional level, Europe outperformed relatively, losing about 5%, while the United States lost nearly 7% and Japan more than 9% (all in local currencies). Although it is difficult to identify a precise cause of the volatility, a combination of events such as the continuous flow of negative information on the potential impact of a trade war on the dynamics of world growth and increased political uncertainty on both sides of the Atlantic certainly weighed on sentiment. That being said, the potential impact on growth and company profits is very difficult to quantify at this stage.

Although price movements in October were a source of discomfort, we remain convinced that the main pillars that support this class of assets are still largely intact. The economic fundamentals seem to be holding up well, while company profits are continuing to grow. The downward trend that we saw over the last few weeks lowered valuations, which should serve as a support to us as the last weeks of the year approach.

In this environment, the Sub-Fund under-performed its benchmark index, in two distinct phases. Firstly, the under-performance of mid-caps affected all sectors and regions with a re-correlation effect in the Sub-Fund. Then, we had some specific news in immuno-oncology. During the annual conference of the European Society of Medical Oncology (ESMO) in October, the progress of Bristol-Myers Squibb Co came to an abrupt halt after a delay on a lung cancer combination, while its competitor Merck & Co won a victory with AstraZeneca Plc in the fight

Management Report (continued)

against ovarian cancer. On small caps, Mirati Therapeutics Inc plunged after disappointing results concerning a therapeutic combination with Opdivo from Bristol-Myers Squibb. Furthermore, Rubraca from Clovis suffered from a lack of attractiveness in prostate cancer without BRCA mutation. Lastly, the period of publication of results in October was difficult for some of our key positions: Elli Mae, AMD, M3, ProofPoint, Cerner ... due to inferior forecasts for the next quarter.

We saw an acceleration of M&A in October in the digital economy, including the acquisition of Red Hat by IBM in our major Big Data theme. This agreement is by far the biggest ever made by IBM and confirms the interest of the large IT companies for the open source theme (Microsoft has bought Github and Salesforce has acquired Mulesoft). In October, in the context of a trade war, we are reviewing the macro-sensitive positions mainly within industry 4.0 and more specifically in the theme of robotics and the intelligent factory and, to a lesser extent, in the theme of electric vehicles. We also reduced our exposure to the Earth dimension.

We have initiated securities with strong visibility on their revenue and cash flow generation: Facebook, GoDaddy, SS&C.

During November, the markets were quiet after a very agitated month of October. World stock markets finished the month about 1% up (in USD). It is important to note the strong sectoral turnover that took place.

At the regional level, the United States outperformed, with an increase of c.2%, Japan with c.1%, while Europe lost c.1% (all in local currency). While the headlines were far from being fascinating during the month, to some extent they obscured the weeks that were important in terms of political news, particularly in Europe.

Concerning the fundamentals, the third quarter results season is completed. The best profit results continue to come from the United States. In Europe, while the profit momentum slowed over the last quarter, we are reassured that the growth in revenue is continuing on an encouraging trend, while cost increases appear to be affecting margins.

What is the latest news in the world of disruption? Google revealed more information on its chauffeur car service. From now on, it will be possible to compare the prices of different companies offering this service by using the voice command through the Google Assistant (GA).

At the Milan motor show, Harley-Davidson presented its latest electric motorbike, Livewire, which will be marketed in 2019.

Illumina acquired Pacific Biosciences for \$1.2 billion with a premium of 79%, which represents the largest acquisition ever made by a company over the last 20 years. This offer supplements Illumina's sequencing solutions, with sequencing abilities to provide solutions for complex genome sequencing.

Amazon announced, during its day dedicated to Cloud services, two new services using blockchain: the Quantum Ledger Database (QLDB) and the Managed Blockchain Service.

In this environment, the Sub-Fund outperformed the MSCI World index, driven by the Digital Economy dimension, notably with the Cloud theme (Twilio) and the Big Data theme (Acacia Communications). The immuno-therapy theme also strongly recovered.

We increased our exposure in Life Sciences (immuno-therapy) and also selectively in Industry 4.0, mainly in electric vehicles, sub-themes in which we see more disruption in terms of valuation. We are continuing to reduce exposure to shares of companies with low capitalisation, preferring large caps providing strong visibility on the revenue and high generation of cash flow. Also, we took profits on shares which performed well over the last few months (such as Twilio).

Management Report (continued)

In December, geopolitical events and fears of a worldwide economic slowdown in 2019 continued to dominate the financial markets with the MSCI World index closing down by 8.8% in euros. Rates are dropping strongly with volatility remaining above its 5-year average.

In the United States, the monetary tightening established by the chairman of the Fed, Jerome Powell, weighed on the performance of the markets. The Fed nevertheless decided to reduce its anticipated rate rises from three to two for 2019. Furthermore, the trade war seems to be subsiding with agreements in principle and the announcement of lowered tariffs on the import of American cars. But the arrest of the CFO of Huawei in Canada and the request for extradition by the US have revived tensions.

In Europe, uncertainties around Brexit weighed on European markets, with the vote on the agreement in the Commons finally pushed back to mid-January by Theresa May. However, the tensions related to Italy seem to be gradually dissipating following the revision by the Italian government of its public deficit target for 2019 (to 2.04%). The "yellow vests" crisis in France and the announcement of new measures to boost purchasing power by Emmanuel Macron weighed on the markets.

Main notable events in the disruptive sphere this month:

- Pew Research published the results of a survey which concluded that, for the first time, social media had beaten the press in the United States as a source of information. Amongst the respondents, about 20% declared that social media was their main source of information, against 16% for printed newspapers.
- Scientists in the University of Lund, in Sweden, finalised a method for converting cells from human skin into dendritic cells, which lymphocyte-T cells used to identify invasive cells. Anti-cancerous treatments, such as immuno-therapy, often manipulate an organism's lymphocyte-T cells to target cancerous tissues; consequently, the ability to convert the cells of the skin of a patient into dendritic cells could considerably reduce rates of rejection.
- Amazon plans to extend its Amazon Go shops without cash tills to airports. Amazon has opened seven shops since January in Chicago, San Francisco and Seattle. The potential for expansion of the brand is enormous due to the high number of passengers in airports with heavy traffic.
- Waymo's long-awaited robot-taxi service was launched on a commercial scale in Phoenix, Arizona, under the name of Waymo One, with a supporting application enabling calls to be made 24 hours a day and 7 days a week. The service is currently limited to a maximum of 400 participants in the "early Rider" programme, which will also continue to function alongside Waymo One.

In this difficult environment, the Sub-Fund under-performed its benchmark index during the last weeks of the month. The main detractor from performance was the exposure in the Health & Life Sciences sector, in the MedTech theme (Exact Sciences, Nuvasive), as well as in the Earth dimension with Bloom Energy.

In December, we are continuing to reduce exposure to the shares of small capitalisation companies, preferring larger capitalisations offering greater visibility of their revenue and a high-level of cash flow generation. We took profits on names that were trading close to our price objectives: Twilio, Paypal and Medtronic, and we reallocated to securities with strongly discounted valuations: First Solar, Facebook. Also, Broadcom was initiated in the IoT theme.

The second half of 2018 was subject to a litany of concerns about the trade war, the Fed and the deceleration of growth. For 2019, we predict a year that is rich in events for the disruptive sphere around the following themes: data confidentiality and cyber security, implementation of 5G, digital health, blockchain and semiconductors,... These cross-functional themes will be key to sustaining performance thanks to acceleration of adoption, the increase in rates of use and new investment cycles.

W WWW.CPR-AM.COM

Management Report (continued)

Outlook for 2019:

We anticipate a year that is rich in events for the disruptive sphere around various themes which should be new drivers of performance thanks to a new investment cycle and an acceleration of the adoption of new technologies:

1) Data confidentiality and cyber security: Although 2018 saw the implementation by Europe of the General Data Protection Regulation (GDPR), the United States could follow the European path with more regulation. Increased concerns in matters of protection of privacy, strengthened by increased regulatory monitoring, continue to stimulate investment in the protection of critical infrastructure, data, systems and applications.

2) the deployment of 5G technology, which will be accompanied by a new investment cycle by the telecoms operators. All of the industries and sectors will be affected by the upgrades to bandwidth with the new use cases, such as autonomous vehicles or the IoT.

3) digital healthcare, which will notably involve the transfer of treatment from the hospital to the home. Although the providers of healthcare have been slow to change, they must now integrate more technologies and improve the sharing of data, emphasising the reduction of costs.

4) Semiconductors which should constitute a driver of performance thanks to a new investment cycle and an acceleration of adoption. What would be the future of transport, artificial intelligence, robotics, intelligent cities and the IoT without semiconductors? All of these sectors benefit from the increasing power of semiconductors, which offer ever more speed and the mobility necessary to intelligence and connectivity that is increasingly constant in all aspects of our lives.

At the same time, we continue to prefer greater exposure to specialised players in niche applications. We are also more constructive on Industry 4.0, mainly in electric vehicles, a theme in which we see more disruption of valuations.

CPR INVEST – EUROPE SPECIAL SITUATIONS

2018 was a transitional year marked by the end of quantitative easing in Europe and the beginning of the policy of monetary tightening in the USA against a background of protectionist tensions and Brexit, which investors fear may cause a real reversal in the cycle.

In this context, the year may be analysed in 2 separate parts:

From 1 January to 30 August 2018, the markets continued to position themselves on defensive growth securities, without taking into account the policy of monetary tightening that began in the 4th quarter of 2017. In this context, the technology, IT services and medical equipment manufacturing sectors outperformed, while the automobile, banks and telecoms sectors marked time

Then, from September 2018, the European markets, destabilised by the rise in American interest rates, reacted violently due to volume of sales by international investors, who unreservedly got rid of all securities that outperformed over the last 5 years. Thus, the mid-caps and technological sectors lost an average of 25% to 30% over the last 3 months of the year. The positive performance gap, between the growth style and the value style, which reached historic heights since 2009 and the beginning of the QE policy, marked time.

The MSCI Europe ended the year 10% down in euros. The defensive sectors were in the lead, notably services to local authorities (+2.9%) and health (-0.4%), accompanied by energy (-0.6%) and followed further behind by telecoms (-8.4%) and non-cyclical consumption (-9%). However, the more cyclical sectors such as materials (-15%) and industrial securities (-13%) suffered badly, followed by the real estate sector (-14.5%). Lastly, financial securities (-19.2%) saw the greatest sectoral drop over the period.

The year 2018 was a difficult one for the “restructuring” theme.

The portfolio suffered mainly:

- From the selection of securities within the technological sector, as well as, to a lesser extent, the selection of securities within the materials, financial and industrial sectors, as well as consumption, financial securities, health, services to local authorities and energy
- From the allocation (under-weighting) of the sector covering services to local authorities

On the contrary, and to a lesser extent, the portfolio benefited:

- From the selection of securities within cyclical consumption
- From the under-weighting of the health sector

More generally, the portfolio suffered from a market environment that was adverse for the risk profile of the economic restructuring and merger-acquisition theme, namely, a market unfavourable to mid-cap stocks, cyclical sectors, growth stocks and momentum stocks, on which we are over-weighted.

The Sub-Fund also suffered from under-investment in high-dividend stocks, low-volatility stocks and defensive stocks, which outperformed the market.

The main sectoral movements during the year were the following:

- 1- Significant strengthening of our position in the health sector, for which the prospects for profitable growth were reviewed upwards. The sector is currently under-weighted by 2.5% in the portfolio.

T 01 53 15 70 00

W WWW.CPR-AM.COM

Management Report (continued)

- 2- Strengthening of our position in the energy sector from the start of the year, to benefit from the impact on profits of the increase in the oil price.
- 3- Strengthening of the telecommunication sector in the second part of the year following its significant under-performance (attractive valuation level) and given an environment more favourable to defensive securities.
- 4- Strengthening of the real estate sector, also in the second part of the year, through German securities, from a point of view of the consolidation of the sector and to benefit from the defensive character of the sector.
- 5- Strengthening of high-quality technological securities (software and services) at the start of the year, to benefit from strong prospects for profitable growth, then strengthening semiconductor securities in the 3rd quarter following their significant under-performance.
- 6- Reduction of our position on non-cyclical consumption through securities in the retail sector in the 1st half-year and the automobile sector in the 4th quarter.
- 7- Significant reduction of our position on financial securities, mainly through bank stocks, from the 2nd quarter, faced with a market environment and rate curve structure that is unfavourable to them.
- 8- Reduction of our position in the materials sector through basic materials from the 2nd quarter, then specialist chemistry during the 2nd half-year. The sector suffered from a strong dollar environment.

With regard to the allocation profile between the two dynamics, we maintained our focus on M&A activity, which accounted for 60% of the portfolio at year-end.

Management Report (continued)

CPR INVEST – FOOD FOR GENERATIONS

In January, Food For Generations dropped, inspired of an environment favourable to stock markets. The performance of the market was driven by the more cyclical sectors, absent from the investment sphere of Food for Generations, at the expense of more defensive sectors such as food and drink products.

For the Sub-Fund, food retailing had the best performance, notably Sprouts Farmers (good trend in sales of organic products) and Kroger (discussions on selling its local shops).

The drinks sector finished the month positively, sustained by the strong increase in Dr Pepper Snapple following the purchase offer from Keurig (unlisted company). The rationale is to combine the hot drinks offer from Keurig (coffee) with that of cold drinks (soda, fruit juice, water) from Dr Pepper Snapple and to share the distribution system.

The food products sector was down over the month, with mixed performance. Our positions in Asia were significantly up: China Mengniu Dairy (dairy products in China) benefited from the rationalisation of the number of producers in China and Yakult Honsha (probiotic yoghurts and drinks) published good results. However, our positions in Europe and the United States were down. Glanbia and Kerry Group were penalised by the drop in the dollar.

In agriculture, Bunge was supported by a rumour of an acquisition by Archer Daniels. Last year, Glencore tried to acquire Bunge. The management of Bunge is under pressure due to disappointing results. The performance of the sector was nevertheless negative over the month. Canadian National Railway and Canadian Pacific Railway were penalised by fears about the reappraisal of the NAFTA trade agreement, in spite of the good revenue dynamics.

The catering sector did not benefit from market sentiment more favourable to discretionary consumption. In spite of the recovery of Elior after a profit warning in November 2017, the collective catering sector is penalised by the lack of increase in margins (Sodexo). Restaurant chains were also down over the month (results below expectations at Dave & Buster).

Lastly, the water sector was heavily penalised by the drop in utilities (American Water Works, United Utilities), which generally suffered from the increase in interest rates, and the fall in Suez, which revised downwards its prospects for earnings (worsening profitability, notably in Spain).

In January, we increased the exposure of the Sub-Fund to more cyclical sectors, notably through the agriculture sector, with securities such as Deere, CNH and Toro (agricultural machinery), Yara (fertiliser) and International Paper (packaging). We reduced our exposure to utilities in water (sale of United Utilities, reduction in our exposure to American Water Works) and to food products (sale of Kellogg).

We strengthened food retailing with Carrefour following the launch of its restructuring plan. In catering, we reduced our exposure to collective catering (Sodexo, Autogrill) for the benefit of Texas Roadhouse in restaurant chains (improvement in consumer confidence in the United States).

Food for Generations dropped **in February** in a market environment that was not very favourable to shares. This drop was triggered by fears of rising inflation and rising interest rates, notably in the United States.

For the Sub-Fund, catering had the best performance, notably GrubHub and Just Eat (online reservation platforms), which take advantage of the rising trend in orders over the Internet. The GrubHub share rose strongly following a partnership agreement with the Yum! group for the management of their meal orders (KFC). In collective catering, Compass is also showing positive performance thanks to good organic growth in North America and in Europe.

The water sector ended the month positively, supported by the rise in Rexnord. The company benefited from growth in revenue of 6% during the last quarter and an improvement of its margins.

The drinks sector dropped slightly over the month, with mixed performance. The Pernod Ricard and Remy Cointreau groups rose most strongly, both driven by better-than-expected growth in

Management Report (continued)

Asia. The sharpest drop was PepsiCo, penalised by 2018 projected earnings that were slightly below expectations at the level of growth in sales and by the use of part of the tax reduction to increase wages and marketing expenditure.

In agriculture, Tractor Supply dropped strongly after publication of projected margins considered disappointing by the market. Kubota (agricultural machines) was strongly impacted by the appreciation of the yen, which penalised its export capacity.

Food products companies were down over the month, in spite of Glanbia holding up well, even though it suffered over the last few months (drop in the US dollar). Rising securities included China Mengniu Dairy (dairy products) and WH Group (stock breeding) in the Asia zone. At the opposite end of the spectrum, we find Pinnacle Foods and Treehouse Food in the United States. The first was penalised by disappointing sales in the fourth quarter and the second by a loss and a lowering of objectives (to enable a cost saving plan to be put in place over 2018).

Lastly, the food retailing sector was down most strongly, mainly affected by the drop in Kroger and Sprouts Farmers. The whole of the sector suffered from the strong drop in Walmart (not held by the Sub-Fund) after a slowdown in the growth of its online sales. Competition from e-commerce remains a threat for traditional retailers.

In February, we reduced our exposure to companies penalised by the sharp drop in the US dollar, such as Glanbia (food products), Autogrill and Sodexo (catering). We took some profit on China Mengniu Dairy and WH Group (food products). In agriculture, we increased our exposure to fertilisers (Mosaic), a sector at the bottom of the cycle for which the supply/demand fundamentals should improve from the end of 2018, and our exposure to agricultural machinery (CNH, Deere), a market which is recovering after 4 years of decline.

Agriculture (demand for animal proteins, recovery in the market for agricultural machines and fertilisers) and food products (demand for animal proteins, market for bio products, potential for concentration in the United States) represent the two main sectors of the Sub-Fund. The catering sector should benefit from the rise in consumer confidence, sustained, particularly in the United States, by the increase in wages. Conversely, the Sub-Fund has currently little exposure to food retailing (increase in competitive intensity) and to water (the rise in rates is unfavourable to water utilities).

Food for Generations dropped **in March** in a difficult market environment, notably due to trade tensions between the United States and certain countries such as China, Mexico or Canada. The cyclical sectors which began the year well were the ones that dropped the most.

The food retailing sector was down strongly (Sprouts Farmers, Kroger). Kroger announced an outlook for 2018 that was below expectations. The move towards more e-commerce is weighing on the entire sector, which remains the least represented in the portfolio.

Cyclical sectors such as agriculture and catering are amongst the steepest drops, notably: fertilisers with Mosaic and Phosagro, agricultural machinery with Kubota and collective catering with Aramark. The online reservation platform Just Eat was also disappointing concerning its prospects for 2018 earnings, with the development of the delivery activity weighing on margins.

The most defensive sectors held up well (food products) or ended the month up (drinks, water). Wessanen (bio food products), China Mengniu Dairy (good sales momentum of dairy products in China), Remy Cointreau (increased sales of cognac in China) and American Water Works (utilities) are amongst the best increases in the month.

In March, we strengthened our exposure to the drinks sector (sales momentum which remains strong) through Pernod Ricard and Diageo and reduced our exposure to collective catering (drop in margins) through Elior.

Agriculture (demand for animal proteins, recovery in the market for agricultural machines and fertilisers) and food products (demand for animal proteins, market for bio products, potential for concentration in the United States) represent the two main sectors of the Sub-Fund. The catering sector should benefit from the rise in consumer confidence, sustained, particularly in the United States, by the increase in wages. Conversely, the Sub-Fund has currently little exposure to food retailing (increase in competitive intensity) and to water (the rise in rates is unfavourable to water utilities).

Management Report (continued)

Food for Generations increased **in April** in an environment more favourable to stock markets. The performance by sector and within each sector was mixed and is more the reflection of news or specific trends on certain securities.

After having dropped steeply in the previous month, food retailing recovered this month (Sprouts Farmers, Kroger). This sector remains volatile in the market and exposed to fears of competition from e-commerce. We are keeping very limited exposure.

Catering made good progress in April, sustained by good sales growth for Texas Roadhouse and the recovery of Just Eat (online reservation platform) after the drop of the previous month.

In drinks, the growth in sales remained oriented towards spirits for Pernod Ricard. We also find Diageo and Brown-Forman amongst the strongest increases.

Food products ended the month up, with an increase on American companies (Nomad Foods, Pinnacle Foods) and European companies (Wessanen, Danone) partly compensated by a drop in Asian securities (China Mengniu Dairy, Dali Foods). These differences are above all explained by the inferior performance of emerging securities over the month rather than specific trends in the food products sector.

In agriculture, stable over the month, performance was mixed. DSM (animal nutrition: outlook revised upwards thanks to the increase in the price of vitamins) and Canadian Pacific Railway (transport: anticipation of price increases) made good progress. However, Deere (agricultural machinery: correction in the capital goods sector in the United States) and Pilgrim's Pride (margin volatility in poultry breeding) dropped.

In April, we strengthened our exposure to emerging countries in food products through Dali Foods, a Chinese company selling snacks and plant-based energy drinks.

Agriculture (demand for animal proteins, recovery in the market for agricultural machines and fertilisers) and food products (demand for animal proteins, market for bio products, potential for concentration in the United States) represent the two main sectors of the Sub-Fund. The catering sector should benefit from the rise in consumer confidence, sustained, particularly in the United States, by the increase in wages. Conversely, the Sub-Fund has currently little exposure to food retailing (increase in competitive intensity) and to water (the rise in rates is unfavourable to utilities).

Food for Generations made good progress **in May** in an environment favourable to stock markets. All sectors had good performance with the exception of food retailing, due to the drop in Sprouts Farmers and Carrefour. This sector is highly volatile and exposed to fears of competition from e-commerce. We are keeping very limited exposure. Catering had the best performance, probably sustained by the increase in salaries in the United States, which benefits restaurant chains (Restaurant Brands International, Dunkin Brands). Online reservation platforms such as Grubhub and Just Eat are continuing to see strong increases in their revenue.

Food products were driven by the good performance of Chinese securities such as Dali Foods and China Mengniu Dairy. European companies such as Glanbia (milk proteins) and Kerry Group (ingredients) benefited from the rise in the US dollar.

In drinks, revenue continues to go in the right direction in spirits (Diageo, Pernod Ricard, Remy Cointreau) with good sales momentum in the United States and a recovery in China and India.

After three months of bad performance, agriculture recovered in May, driven by the most cyclical segments such as agricultural machines (Deere) and fertilisers (Mosaic). The market for agricultural machines has been recovering since 2017. That for fertilisers is at the bottom of the cycle, with an improvement in the supply/demand balance from the end of 2018.

The water sector, penalised by the increase in interest rates, also recovered in May. Water distribution and treatment companies such as Veolia and Suez are up, as well as Rexnord in equipment for water networks. The latter published results for the 1st quarter of 2018 that were better than expected.

In May, we initiated a position on Xylem (equipment for water networks and intelligent meters) in the water sector, on Costco in food retailing (the concept of the warehouse club is growing strongly) and on Xiabuxiabu (restaurant chain developing strongly in China). However, we took

Management Report (continued)

profits on China Mengniu Dairy (number two in dairy products in China) and reduced our exposure to Ingredion (maize processing) due to the exposure to Argentina and Brazil.

Agriculture (demand for animal proteins, recovery in the market for agricultural machines and fertilisers) and food products (demand for animal proteins, market for bio products, potential for concentration in the United States) represent the two main sectors of the Sub-Fund. The catering sector should benefit from the rise in consumer confidence, sustained, particularly in the United States, by the increase in wages. Conversely, the Sub-Fund has currently little exposure to food retailing (increase in competitive intensity) and to water (the rise in rates is unfavourable to utilities).

Food for Generations slightly dropped **in June**, mainly due to a fall in the drinks sector. Rémy Cointreau suffered profit-taking after the strong increase over the last few months and Brown Forman could be penalised by the taxation of its whiskey exports in Europe, a retaliatory measure following the taxation of European products in the United States. In food products, Conagra announced the purchase of Pinnacle Foods, forming the number 1 in frozen products in the United States. Nomad Foods, one of the leaders in frozen products in Europe, benefited from the announcement of this merger. Chinese companies such as China Mengniu Dairy and WH Group suffered, like the entire Chinese market, from uncertainties related to the start of the trade war with the United States. WH Group is a big producer of pork in both countries. However, its flows between the United States and China are not very high. Eurofins (bio-analysis services), a security that entered the portfolio in June, increased strongly following the confirmation of its organic growth expectations and the revision of its revenue to include the latest acquisitions. In agriculture, agricultural machinery companies (Deere, Kubota) suffered following international trade tensions. In food retailing, Kroger increased strongly following quarterly results that were reassuring in terms of revenue and margin. However, Carrefour ended the month significantly down. The company announced a partnership with Tesco in purchasing. Similar agreements were concluded over the last few months with other retailers, showing the necessity of cost reduction.

In June, we strengthened our position on Nomad Foods (frozen products) and initiated a position on Eurofins (food analysis) after a drop in valuation over the last few months. We took profits on China Mengniu Dairy (milk products in China) and sold our Xiabuxiabu securities (catering in China) following the strong increase in the stock.

Agriculture (demand for animal proteins, recovery in the market for agricultural machines and fertilisers) and food products (demand for animal proteins, market for bio products, potential for concentration in the United States) represent the two main sectors of the Sub-Fund. The catering sector should benefit from the rise in consumer confidence, sustained, particularly in the United States, by the increase in wages. Conversely, the Sub-Fund has currently little exposure to food retailing (increase in competitive intensity) and to water (the rise in rates is unfavourable to utilities).

Food for Generations increased in **July** in an environment of stock-market recovery. All sectors were up, with the exception of food products. The publication of second-quarter results was the main reason for the increases or drops in securities.

Food products were penalised by the correction in Wessanen (bio products), for which growth in France slowed due to stronger competition. We reduced our position because this lower growth could last. Tyson Foods suffered a drop in profitability in its chicken and pork divisions. The increases in import taxes in China reduced outlets for American breeding companies. Danone made good progress, with quarterly results showing organic growth that remains strong. The water sector had the best performance thanks to the good results of Xylem (equipment for networks) and better growth in revenue at Suez (distribution and treatment of water). In catering, Grubhub (online reservation platform) increased strongly while the strong growth in revenue (50%) continued and the earnings per order increased in spite of the investment in home delivery. In agriculture, Canadian Pacific Railway (transport) and Croda (ingredients) published good growth in revenue. Fertilisers (Mosaic, Yara) benefited from price improvements. Ingredion (maize processing) nevertheless dropped due to a drop in demand for

Management Report (continued)

glucose syrup and starch in the United States. In the drinks sector, the growth in revenue remains strong, between 5% and 6% for Diageo, Rémy Cointreau and Heineken. The latter nevertheless suffered a slight drop in margin (cost increase and exchange-rate effects). In food retailing, we note the recovery of Carrefour after the drop of the previous months, based on reassuring quarterly results.

The half-yearly results season is not finished, but we can distinguish several trends. The growth in revenue remains strong for drinks, especially spirits, and it appears to be improving in food products. Cost inflation is often mentioned by American food products companies (notably transport costs), which limits the improvement in margins. In agriculture, trade tensions are beginning to have an impact on American meat exporters. We have reduced our exposure to this type of security. The industrial companies related to the water sector are benefiting from a good momentum in sales.

Food for Generations increased in **August** in an environment favourable to the American stock-market (strong increase in the technology sector) but unfavourable to other stock markets. The emerging markets are suffering from trade tensions between China and the United States and the Turkish and Argentinian crises. Generally, the Asian securities in the Sub-Fund are down over the month (China Mengniu Dairy, Dali Foods).

Food retailing is strongly up over the month, notably Sprouts Farmers, Kroger and Costco in the United States. In spite of the increased competition from e-commerce, organic growth in revenue was satisfactory. Catering also increased over the month, sustained by Grubhub in the online reservation platforms and American restaurant chains such as Texas Roadhouse and Dunkin Brands. Following the acquisition of Costa coffees by Coca Cola, Dunkin Brands is now a potential target. Agriculture is up in spite of commercial tensions reducing American exports to China. Tractor Supply (retailing) and Canadian Pacific Railway (transport) are benefiting from good momentum in revenue and the fertiliser segment is recovering after several years under pressure (Mosaic, Yara). The problem of overcapacity should be reduced from 2019. We have strengthened our position on Mosaic. However, Bunge (agricultural services) disappointed concerning its half-yearly results. The annual forecasts were nevertheless maintained.

Food products are marginally positive, with the drop in Asian securities being compensated by the good sales momentum in ingredients (Kerry Group, Glanbia) and the frozen products of Nomad Foods. The water sector is down over the month, mainly after the mixed half-yearly results of Veolia, for which growth is decelerating. The drinks sector is also down (Diageo, Pernod), in spite of growth in revenue, which remains strong in spirits. The strong exposure to drinks securities in emerging markets probably had a negative impact on market sentiment.

Agriculture (demand for animal proteins in emerging countries, market recovery in agricultural machines and fertilisers) and food products (market for bio products, snacks market, potential for concentration in the United States) represent the two main sectors of the Sub-Fund. The catering sector should benefit from the rise in consumer confidence, sustained, particularly in the United States, by the increase in wages. Conversely, the Sub-Fund has currently little exposure to food retailing (increase in competitive intensity) and to water (the rise in rates is unfavourable to utilities).

Food for Generations slightly increased in **September**.

The weakness of stock markets and emerging currencies weighed on the food products and drinks sectors, which have generally quite strong exposure to these markets. Thus we see Heineken, Rémy Cointreau and WH Group amongst those that dropped. Conagra (food products in the United States) also published quarterly results that were below expectations in terms of margin. We sold our Tyson Foods securities following the surprise departure of the Chief Executive Officer. In spite of its exposure to China, China Mengniu Dairy recovered strongly thanks to good progress in its sales of dairy products.

Agriculture made good progress over the month, with a recovery in producers of agricultural machines (Kubota, Deere), which have suffered from international trade tensions. The

Management Report (continued)

producers of fertilisers (Mosaic, Yara) benefited from price increases. Production overcapacity should reduce from 2019.

The water sector is also significantly up, sustained by capital goods companies such as Rexnord and Xylem. However, utilities and similar such as Suez and Veolia are starting to suffer from the increase in interest rates. This is the main reason for the low exposure of the Sub-Fund to the water sector.

Food retailing and catering end the month slightly up. Collective catering made good progress (Aramark, Compass) and the American restaurant chains (Dunkin Brands, Texas Roadhouse) are supported by a more favourable employment market. However, the online reservation platforms dropped. After an excellent performance, Grubhub dropped slightly. Just Eat underwent a strong correction, while the possible merger of Uber Eats and Deliveroo (listed players) would create a more powerful competitor, notably in England. We reduced our exposure to this company.

The strong increase in interest rates in September, fed by expectations of a rise in inflation in the United States, is negative for the relative stock-market performance of utilities and, to a lesser extent, food products. It is more positive for the most cyclical sectors. This is the reason why we are maintaining quite low exposure to the water sector (utilities). During the month, we also reduced our exposure to food products (selling Tyson and Pinnacle Food in particular). Agriculture, which is more cyclical, represents the primary sector of the Sub-Fund.

Food for Generations dropped strongly in **October**, in line with world stock markets, which underwent a strong correction due to fears about the deceleration of economic growth. The most cyclical sectors suffered the most, as well as certain sectors/securities that had made good progress since the beginning of the year.

The most defensive sectors, such as food retailing, food products and drinks held up best. Catering, agriculture and water, the most cyclical sectors, suffered more.

Food retailing ended the month up thanks to Sprouts Farmers, Kroger and Carrefour. With a return of the growth of sales in France, Carrefour reassured with the publication of its quarterly revenue. The drop in the food products and drinks sectors was relatively limited. Conagra and Mondelez as well as Pepsico and Diageo were amongst the best performers. Viscofan (packaging for sausages) published disappointing results due to a slowdown of its sales in China. After good performance since the beginning of the year, the security underwent a strong correction. We sold our position.

Catering had the worst performance over the month. The reservation platform Grubhub dropped strongly, while the strong growth in revenue was accompanied by an increase in costs. The share also suffered the influence of the drop in the technology sector in the market. We reduced our position on this share.

In agriculture, the most cyclical securities such as agricultural machines (Deere) or those that had made good progress, such as DSM (animal nutrition) or Croda (ingredients) suffered a correction. In water, the utilities ended the month up (American Water Works, Veolia, Suez) while industrial companies such as Rexnord and Xylem suffered a correction. At the end of the month, both companies published good quarterly results with revenue growth of 8-9%.

In the current market environment, we reduced our exposure to certain cyclical securities in agriculture (Yara, Bunge) and in catering (Texas Roadhouse). The positions on food products and drinks should enable the Sub-Fund to hold up in case of a steep drop in world economic growth.

Food for Generations recovered in **November**, in a market environment marked by an increase in volatility. Fears concerning worldwide economic growth remained strong, in spite of defensive sectors which made progress in November. This market environment is relatively favourable to Food for Generations, which has a more defensive profile than the MSCI World index.

The food retailing sector is down over the month due to the surprise departure of the Chief Executive of Sprouts Farmers. There was no change in prospects, but we nevertheless reduced exposure to this security. Carrefour also suffered from delays in implementing rules limiting

Management Report (continued)

loss sales and promotions and from the fall in traffic in its shops due to demonstrations in France.

All other sectors made progress over the month.

The catering sector had the strongest progress, notably thanks to American companies such as Darden and Dunkin Brands, probably supported by the strength of the jobs market in the United States. In collective catering, Compass maintained strong growth in revenue at +7% over the last quarter, notably thanks to American activity.

The water sector benefited from a resumption of interest in more defensive securities, such as utilities (American Water Works, Veolia).

The drinks and food products sectors played their role as safe havens, with Pernod and Diageo as well as Mondelez and Danone amongst the strongest increases.

In agriculture, the average increase masks a certain disparity in performance. Agricultural machinery companies such as Deere and Kubota have bounced back. They published forecasts for 2019 confirming the recovery in their markets but at a moderate rate. The prices of fertilisers recovered, which supported Mosaic. However, Yara dropped, probably due to the increase in the price of natural gas in Europe, a key raw material for the production of urea. Evonik (animal nutrition) dropped sharply due to fears about a slowdown in its industrial chemistry activities.

In November, we strengthened our position on Darden in catering. In agriculture, we sold our position in CNH Industrial (agricultural machinery) due to the exposure of the company to industrial sectors which could suffer from a deceleration in world growth. We initiated a position on GEA Group, one of the leaders in equipment for farms and dairies. This security is at a low point in 5 years, following the drop in margins. However, orders are increasing, debt is almost non-existent and the available generation of cash flow largely covers the dividend.

The stock markets dropped sharply **in December**, based on fears of a slowdown in world growth. All sectors dropped, with little differentiation.

Food for Generations also dropped sharply over the month, in line with the market.

The drinks sector held up well thanks to certain specific events that led to the rise of Pernod Ricard (entry into the capital of an activist shareholder), of Suntory (price increase in Japan) and Coca-Cola HBC (good sales momentum for this Coca-Cola distributor in certain emerging countries). All of the other sectors are sharply down. In notable events, we note the sharp drop in Aramark (collective catering) and Conagra (food products in the United States) following 2019 growth prospects below expectations, as well as the fertiliser producer Mosaic for its cyclical profile. After having suffered the previous month, Asian food products companies are up over the month, notably WH Group and China Mengniu Dairy in China. The stock markets in emerging countries held up much better than the developed countries in December.

In December, we strengthened our position, initiated in November, on GEA Group (equipment for agriculture and agri-food). We initiated a position on Elixior (collective catering) as the sale of concession activities in airports, stations and on motorways would eliminate the group's debt. The security is at a 5-year low point. We also initiated a position on Seb (kitchen equipment), a security which dropped sharply in spite of leading positions in a market that is growing strongly, notably in China.

Agriculture is the primary exposure of the Sub-Fund, with ingredients companies whose growth remains robust, the continuation of the market recovery in agricultural machinery supported by the development of precision agriculture, as well as the recovery in the prices of fertiliser. Food products and drinks also represent significant exposure for the Sub-Fund. These two defensive sectors should hold up better than average in case of a sharp drop in world growth. We place emphasis on the momentum of sales in emerging countries, the growth of dairy products and natural and bio products. In catering, the strength of the jobs market is a positive element for demand in the United States, even though the increase in wages, which accompanies it, can weigh on personnel costs. In water, the threat of interest rate rises on the performance of utilities has disappeared. Our positions are balanced between utilities and producers of equipment for water networks. Retailing is still threatened by hard discounters and e-commerce. Our limited exposure favours specific concepts such as bio or discounting.

Management Report (continued)

CPR INVEST – MEGATRENDS

Market environment in 2018

One step forward, two steps back: this is how we could qualify 2018. An atypical year after ten years of market growth, when no financial market did better than inflation and all finished down, with the exception of Brazil. It was also atypical with the return of volatility in the markets, worsened geopolitical tensions and a consensus which went from synchronised worldwide growth to the fear of a global slowdown.

The beginning of the year was characterised by a continuation of 2017 in the growth sectors, without taking into account the changing monetary policies and treating the warnings of February with disdain. Technology, discretionary consumption and materials continued to forge ahead. Meanwhile, health, financials and basic consumer goods marked time. From September, the increase in American rates destabilised the markets, the valuations being too high and the markets collapsing. First in the mid-caps segment then in all listed stocks. Pharmaceuticals are becoming a substitute for growth stocks; basic consumer goods, communication services and services to local authorities outperformed on the downside.

Management actions in 2018

The Sub-Fund had performance of -7.11% against its benchmark index at -4.11% (Part I, net of fees). The year 2018 took place in two phases. Firstly, driven by tax measures and good microeconomic and macroeconomic publications, particularly American, our allocation favoured a cyclical approach and growth (global Disruptive and Lifestyle); the Sub-Fund outperformed in the first half-year.

The under-performance began at the beginning of summer with the sharp drop in emerging markets and commodities (gold). This worsened due to our positioning on the Lifestyle and Disruptive themes. October saw a break with a stabilisation of performance and our repositioning on more defensive and less volatile Sub-Funds for the end of the year (Food for Generation and Global Silver Age).

Outlook for 2019

The macro-economic forecasts for 2019 were constantly reviewed downwards but remain at higher levels than their long-term trend, with a growth of global GDP at around 3.5%. This is therefore not a question of level but of change of momentum. In this context, we retain a prudent outlook although the markets are seeking a point of equilibrium in terms of valuation. Although the markets appear to have over-reacted and anticipated the worst, which could lead to a rally at the beginning of the year, this should be confirmed in the following month. For this to happen in 2019, profitable growth must overcome the negative sentiment of the markets, the visibility of geopolitical tensions must improve and the central banks must avoid making mistakes. All this points to a level of volatility more in line with the history of the financial markets and well above that of the last 3 years. This environment should favour active management and stock picking.

Management Report (continued)**CPR INVEST – GEAR EMERGING (launched on October 11, 2018)**

Emerging markets dropped by 6.4% (in EUR) in October and under-performed the developed markets by 1.4%. Latin America was the only zone to have increased (+6.1%) while the EMEA and Asia zones dropped respectively 6.5% and 8.7%.

The Asian markets suffered from a massive sell-off which started in the American market after companies (notably Caterpillar & 3M) announced negative forecasts for their results due to uncertainties related to trade tensions between the US and China. The Chinese, Korean and Taiwanese markets suffered the most.

At the sector level, services to local authorities and financials outperformed, while health and IT under-performed.

Emerging shares had net outflows of \$2.9 billion over the month and net inflows of \$10.5 billion since the beginning of the year.

Emerging markets increased by 4.2% (in EUR) in November and outperformed developed markets by 3%. Asia recovered 5.2% after a difficult month of October, followed by the EMEA zone (+4.6%). Latin America dropped by 2.1%.

The rally in emerging markets was led by China (+7.4%) drawn by the confirmation of the meeting between Donald Trump and Xi Jinping at the G20, and the positive tone of the American administration in finding an agreement between the two countries. At the macro level, infrastructure expenditure in China continued to recover in October and the government continued to support SMEs and companies in the private sector, revealing more measures. Reductions in VAT and taxes are also being studied.

At the sectoral level, industry and discretionary consumption outperformed, while energy and materials under-performed.

Emerging shares saw net inflows of \$6.3 billion over the month and net inflows of \$16.7 billion since the start of the year.

Emerging markets dropped by 2.7% (in USD) in December but outperformed developed markets by 5%. Latin America finished almost unchanged (-0.8%), followed by the EMEA zone (-1.6%). Asia dropped by 3.2%.

The strong increase in November that followed the G20 meeting stopped suddenly due to the reversal of the rate curve in the United States (2-5 years) and the aggravation of fears of the end of the cycle in the US. In this context, the Fed pursued its monetary tightening by 25 bps, further fuelling negative sentiment. The cyclical sectors dropped sharply, Brent and WTI saw a new increase of 9% faced with concerns relative to the slowdown in the worldwide economy and the over-abundance in oil supply.

At the sector level, services to local authorities and basic consumption outperformed, while health and discretionary consumption under-performed.

Emerging shares saw net inflows of \$2.6 billion over the month and net inflows of \$21.7 billion since the start of the year.

Over the year, the Sub-Fund under-performed its benchmark index.

The selection in discretionary consumption and health contributed positively. On the other hand, it was negative on the financial sectors and IT.

In terms of geography, the selection on China and Malaysian was positive, but negative on India and South Korea.

Management Report (continued)

CPR INVEST – GEAR WORLD (launched on October 11, 2018)

October saw a drop in all of the large world indices. The correction was quite consistent. The risk aversion benefited US markets, which had the least bad performance of the month.

In the United States, the S&P dropped by 6.8% in dollars (4.4% in euros) in spite of publications that were favourable overall. More than three quarters of publications exceeded expectations, with an average increase in results expected around 26%. Out of 348 companies in the S&P 500 index which had published their figures on 31 October, 77% had profit above expectations, 9% in line and only 14% below. Although the American indices were not contaminated at the beginning of the period by worries of a very European nature related to the possible loss of control of the Italian budget, it was above all the words of Jerome Powell that drove up bond yields and dropped shares from the first week of the month. Concerns about the trade war and the Chinese slowdown also contributed to the drop, fuelled by the comments of several symbolic companies on the occasion of the quarterly publications. The disappointing results of Amazon and Google at the end of the month moved in the same bad direction.

More surprisingly, the Japanese Nikkei also suffered greatly (-9.1%). The marginal appreciation of the yen, the weight of its exporters and the collapse of Softbank (-15.4%) weighed heavily. In Europe, the Stoxx 600 lost 5.5%. The Eurozone underperformed (-6.1% for the MSCI Euro index) due to the under-performance of the Italian MIB (-8%) and sovereign sectors, and the steep drop in the CAC40 (-7.2%).

Emerging markets dropped by 6.4% (in EUR) in October and under-performed the developed markets by 1.4%. Latin America was the only zone to have increased (+6.1%) while the EMEA and Asia zones dropped respectively 6.5% and 8.7%.

November can be broken down into three separate periods. The start of the month saw the continuation of the technical recovery initiated at the end of the previous month, catching up the correction of the first four weeks. The accommodating position of the bank of Japan and a draft trade agreement between the USA and China supported this increase. The trend levelled off with the results of the mid-term elections when the president hardened his position on raising tariffs on Chinese imports and European cars. The market recovered at the very end of the month, following a speech by representatives of the Fed, including its chairman, on the level of interest rates, described as "just below neutral rates".

Finally, the MSCI AC finished the month up by 1.1%. The S&P, the Nikkei and the MSCI EM recovered between 1.5% and 4%. However, European indices finished in the red, the MSCI Europe at -0.8% and the MSCI Eurozone at -0.3%.

Abbvie (+21.1%) and Pfizer (+8.2%) drove pharmaceuticals, the two groups having received the approval of the FDA to market certain products. Within financials (+2.8%), it was above all the insurers (+5.9%) that performed well. Only 3 major sectors ended in the red (communication services at -0.7%, energy at -1.6% and technology at -1.9%). Technology dropped for the 3rd consecutive month (-11.7% since the end of September). Apple lost 18.2% on fears of a slowdown in demand for iPhones. Facebook (-7.4%) continued to drop, due to scandals around fake news. Nvidia dropped by 22.4% after a profit warning, weighing on the semi-conductors Sub-Fund (+0.1%). Unsurprisingly, the oil companies suffered from the drop in the price of oil (WTI -22%).

Following the series of natural disasters which struck Japan this year, the economy contracted in the third quarter, growth being -0.3% on a sliding quarterly basis. The underlying macroeconomic fundamentals of Japan nevertheless remain unchanged: wages growth remains strong and company industrial investments should resume over the forthcoming quarters.

In the Eurozone and the United Kingdom, macroeconomic signals remain poorly oriented overall. On the stock markets, sectoral turnover accelerated. The defensive stocks had the best performance, some driven by the simultaneous drop in interest rates. The peripherals also benefited from the contraction of their spreads and good performance of their sovereign vehicles.

December was the occasion for a violent correction for all large world markets. The first downward movement was initiated following comments by Donald Trump on his meeting with Xi Jinping and doubts on the way in which the trade negotiations could continue. The constructive attitude of China and the announcement of the tariff reduction provided no reassurance, while the arrest of the daughter of the founder of Huawei reapplied the pressure. After a week of stabilisation, a conservative speech from Xi Jinping and the speech which accompanied the Fed's rate rise led to a new downward movement, that was particularly sharp in Japan and the USA. A technical recovery limited the damage at the end of the month.

The under-performance of the American market is one of the specifics of this drop. The arrival in the House of a Democratic majority in November fed concerns about possible institutional blockages which, over the last two years, have been the prerogative of Europe within the developed economies. The partial shutdown decided by Donald Trump at the end of the period validated this fear. The disappointment caused by the comments of Jay Powell on 19 December, which were less accommodating than expected, did not help. Neither did the downward revision by 130 bps of the 2019 earnings-per-share forecasts of analysts, due to the strengthening of the dollar since the end of September and a negative base effect over the first 6 months of the forthcoming year.

Over the year, the Sub-Fund under-performed its benchmark index.

The selection on communication services and basic consumption contributed positively. On the other hand, it was negative on the financial sectors and discretionary consumption.

In geographical terms, the selection on South Korea and Canada was positive but negative on Japan and Australia.

Management Report (continued)

CPR INVEST – EDUCATION (launched on October 2, 2018)

Market Environment in 2018

The commentaries relate to the period beginning on 02/10/2018, when the Sub-Fund was launched.

Global equities posted sharp declines in Q4 due to fears over economic momentum and slower earnings growth, impacting all equity markets indifferently. The US-China trade dispute continued to hamper investor optimism. Government bond yields generally fell reflecting the broad uncertainty.

In the US, Donald Trump's protectionist stance on China appeared to be having a tangible impact: Chinese growth slowed to a nine-year low in Q3. The Fed raised interest rates in December on continued stability in economic data. The labour market remained extremely strong. However, the central bank grew otherwise more dovish in tone, signalling a more cautious view for coming months. It has revised down its "dot plot", meaning it now expects two interest rate increases in 2019 instead of three previously, reflecting more cautious economic forecasts.

European equities also declined, with trade tariffs, slower Chinese growth and Brexit combining to form a difficult environment. The European Commission and Italy reached a compromise on the Italian budget for 2019, allowing Rome to escape a sanction for an excessive deficit. In the Eurozone economy, data continued to point to slowing momentum. The ECB left its monetary policy unchanged and will terminate net asset purchases (QE) at the end of 2018, while confirming that it would not raise its rates before summer 2019 at the earliest.

Since inception (October 2nd 2018), the Sub-Fund outperformed its reference index. The best contributors to performance have been K-12 (driven by good Q3 results and renewed investors' interest for after school tutoring services), Publishing and content (resilience of the sector in a risk-off market), student accommodations. Performance has been dampened by detractors within the Career Development / recruitment sub-sector as HR services companies dropped driven by poor market sentiment and data. In terms of stocks, K12 Inc, G8 Education, Houghton Mifflin Harcourt were the best contributors while Learning Technologies, En-Japan and Navient were the worst.

Management Report (continued)

CPR INVEST – SMART BETA CREDIT ESG (launched on December 6, 2018)

The economy in 2018

While 2017 was marked by a synchronised acceleration of the economies, 2018 was marked by the acceleration of activity in the United States, flowing against the rest of the world, which was slowing down.

In the United States, the American economy accelerated in 2018, thanks to the tax reform obtained by President Trump in December 2017, which resulted in a significant drop in tax for households and companies. Economic surveys carried out with companies and households remained pointing in the right direction until the last months and only the surveys focused on the manufacturing sector showed a real slowdown at the end of the year. However, the property market showed signs of running out of steam from the beginning of 2018, probably translating the first effects of interest rate rises. The job market is still very dynamic with strong job creation and an unemployment rate at 3.9% of the population, which is close to full employment. Salaries accelerated at the end of the year, to reach 3.2%. Inflation, which was caused by the rise in the oil price during the whole of the first part of the year, fell back at the end of the period to join underlying inflation, which was slightly above 2%. In this context, the central bank raised its base rate in 2018 in four stages, the target range of the Sub-Funds having been brought to 2.25-2.50%. In December, the members of the FOMC indicated that they planned to raise rates twice more in 2019. This goes against market expectations, which turned around at the end of the year and are now expecting a first fall in rates. The impact of the first concrete measures in increasing customs tariffs, the threats of their extension to key sectors (automobiles,...), and the very difficult discussions with China are all elements that weighed on the confidence of the markets initially, and which seemed to be affecting the real economy at the end of the year, with the drop in sentiment revealed by economic surveys. Finally, the political situation inside the United States has changed since the arrival in the House of Representatives of a Democratic majority in November, which has fed concerns of possible institutional deadlock. The partial shutdown decided by Donald Trump at the end of the period is a worrying illustration of this.

In the Eurozone, after a particularly prosperous year 2017, growth slowed sharply, even though, in total, it continues to be greater than its potential. The year should finish with GDP around 1.8% in 2018. Unemployment is going down in all countries and reached 8.1% on average in the zone at the end of the year. However, economic surveys have clearly turned in the entire zone, primarily affecting the manufacturing sector due to trade tensions, but the domestic situation in certain countries of the zone (Italy, France) has resulted in a clear slowdown in services. After having increased at the start of the year, underlying inflation stabilised around 1%. In this context, in December, the European Central bank ended its policy of purchasing securities, as it had announced. However, it specified that it wished to maintain its rates unchanged, which leaves the EONIA broadly negative, at least until the summer of 2019: the monetary accommodation is therefore not finished. The political situation, however, remained complicated throughout the year. This began with the difficulties in forming a government in Germany. Angela Merkel came out weakened in constituting the coalition government between the Christian Democrats and Social Democrats. Then, concerns focused on Italy, initially with the appointment of a coalition government bringing together two rather Eurosceptic parties, the League / 5 Star, in May, then in September, the preparation of the 2019 budget defying European budgetary rules, which impose a trajectory of Italian debt reduction. The government and the European Commission finally found an agreement to avoid the procedure for excessive deficit. Nevertheless, the Italian budgetary situation should remain difficult, given the sharp economic slowdown in Italy.

Political risk in Europe also arises from Brexit, where the negotiations have still not led to the signature of an agreement between the United Kingdom and Europe. The probability of a "hard brexit" remained strong at the end of 2018.

Management Report (continued)

In Japan, growth had a very uneven profile, partly caused by natural disasters which have affected the country. Households are hardly consuming anything and their real income continues to stagnate. Even so, the surveys have remained at levels that are quite correct, in spite of the trade tensions, and the jobs market is very tight. Inflation stabilised around 1% year-on-year, still far from the central bank's objective of 2%. This should lead it to continue a long-term policy of "qualitative and quantitative flexibility with targeting of the rate curve". It has also adopted very explicit forward guidance. Shinzo Abe, re-elected at the head of his party, should continue implementing his policy of strengthening growth potential, after a pause in the spring due to various scandals.

In China, growth slowed throughout the year and the latest indicators of activity are more mixed, notably with a very clear weakening of the manufacturing sector at the end of the year. The policy of reducing the debts of companies and local authorities has affected real activity via the drop in investment throughout the year. The authorities reacted by relaxing monetary constraints and resuming an expansionist budgetary policy. The power of Xi Jinping was strengthened at the XIXth Congress of the Communist Party and the National People's Congress in March, with the abolition of the limitation on two presidential terms; this implies increased control of the party over the economy. After the depreciation of the yuan at the beginning of the summer, the authorities seemed to want to counter downward speculation against the currency, but the latest movements of the currency have shown that it was an instrument in the hands of the authorities to respond to American sanctions. The time has now come for trade negotiations between the two heads of state.

The rest of the emerging world was broadly penalised by the trade tensions which primarily affected the countries and sectors most exposed to global trade. This movement continued in favour of the clear appreciation of the dollar and American rates during the 1st half of the year. Specific situations, in Argentina and Turkey, contributed to fuelling a climate of distrust in emerging assets, even though the fundamentals were generally not worsened. The arrival in power of the new government in Brazil brought a recovery in this market. Oil also had a very uneven profile over 2018, with a first phase of appreciation to a high of \$85 in October, to finally collapse, against expectations, following the reintroduction of American sanctions targeting Iranian exports.

Management Report (continued)

CPR INVEST – CLIMATE ACTIONS (launched on December 7, 2018)

The Sub-Fund CPR Invest - Climate Actions was launched on 7 December 2018. The management strategy carried out in December consists of constructing the portfolio.

On 31 December, the structure of the portfolio was the following:

From a geographical point of view, the portfolio preferred Europe (EMU and ex-EMU) and Japan, over-exposed compared to the benchmark index (MSCI ACWI). Although the United States was the number 1 geographical exposure in absolute terms, a notable under-exposure was adopted compared to the benchmark index. Asia ex-Japan and the emerging countries were also under-represented.

From a sectoral point of view, discretionary consumption (durable consumer goods and non-food retail in particular), pharmaceuticals and food retailing were the main sectoral bets of the portfolio. Packaging, within materials, was also over-exposed. However, communication services, particularly media, financial and energy securities were largely under-exposed. Utilities, information technology and industrial securities, to a lesser extent, were also under-represented.

REPORT OF THE RÉVISEUR D'ENTREPRISES AGRÉÉ

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of CPR Invest (the “Company”) and of each of its sub-funds, which comprise the statement of net assets and the securities portfolio as at December 31, 2018, the statement of operations and the statement of changes in net assets for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of CPR Invest and of each of its sub-funds as at December 31, 2018, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with the Law of July 23, 2016 on the audit profession (Law of July 23, 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (CSSF). Our responsibilities under the Law of July 23, 2016 and ISAs are further described in the “Responsibilities of the Réviseur d’Entreprises Agréé for the Audit of the Financial Statements” section of our report. We are also independent of the Company in accordance with the International Ethics Standards Board for Accountants’ Code of Ethics for Professional Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Company is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our report of the *Réviseur d'Entreprises Agréé* thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we concluded that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Company for the Financial Statements

The Board of Directors of the Company is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Company determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Company is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Company either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the *Réviseur d'Entreprises Agréé* for the Audit of the Financial Statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the *Réviseur d'Entreprises Agréé* that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law dated July 23, 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law dated July 23, 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Company.

- Conclude on the appropriateness of Board of Directors of the Company's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the *Réviseur d'Entreprises Agréé* to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the *Réviseur d'Entreprises Agréé*. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

For Deloitte Audit, *Cabinet de Révision Agréé*

Laurent Fedrigo, *Réviseur d'Entreprises Agréé*

Other notes to the financial statements

CPR Invest

Other notes to the financial statements as at December 31, 2018

1. General Information

CPR Invest (the "Company") was incorporated in Luxembourg as a "Société d'Investissement à Capital Variable" (SICAV) on August 19, 2014 and qualifies as an open-ended collective investment company. The Company is submitted to Part I of the amended law of December 17, 2010 relating to Undertakings for Collective Investment in Transferable Securities (the "Law"). The Company is incorporated for an unlimited period and is registered under the number B189795.

The Company qualifies as an Undertaking for Collective Investment in Transferable Securities (UCITS) under the Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009 on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities. The European Directive 2014/91/EU ("UCITS V") amending Directive 2009/65/EC on undertakings for collective investment in transferable securities, which is applicable to the Company, came into force on 18 March 2016. It is implemented in national law under the Luxembourg Act of 10 May 2016 implementing Directive 2014/91/EU.

The Company has the structure of an umbrella fund with the ability to provide investors with investment opportunities in a variety of Sub-Funds.

The Company has appointed CPR Asset Management, a "société anonyme" governed by French laws to act as its Management Company (the "Management Company"), pursuant to a management company services agreement dated August 19, 2014. Under this agreement, the Management Company provides investment management services, administrative agency, registrar and transfer agency services and marketing, principal distribution and sales services to the Company, subject to the overall supervision and control of the Board of Directors of the Company.

As at December 31, 2018, the following Sub-Funds are open:

CPR Invest - Silver Age
CPR Invest - Reactive
CPR Invest - Defensive
CPR Invest - Euro High Dividend
CPR Invest - Dynamic
CPR Invest - Global Silver Age

* Hedged Classes of shares : this operation aims to hedge the exchange rate risk in the currency of the shares compared to the reference currency of the Sub-Funds (EUR).

The detail of each class of shares offered within each Sub-Fund is disclosed in the current prospectus of the Company.

Other notes to the financial statements as at December 31, 2018 (continued)**2. Principal accounting principles**2.a. Presentation of the financial statements

The financial statements of the Company are presented in accordance with the Luxembourg legal and regulatory requirements relating to undertakings for collective investment in transferable securities and prepared in accordance with generally accepted accounting principles in Luxembourg. The combined financial statements of the Company are expressed in EUR and obtained by addition of the figures of the different Sub-Funds on a line by line basis.

2.b. Valuation policy of investments

Securities or financial instruments admitted for official listing on a regulated market are valued on the basis of the last available price at the time when the valuation is carried out. If the same security is quoted on a regulated market, the quotation on the principal market for this security will be used. If there is no relevant quotation or if the quotations are not representative of the fair value, the evaluation will be made in good faith by the Board of Directors of the Company or their delegate.

2.c. Valuation policy of the Master Funds

The valuation of units or shares of the Master Funds is based on the last determined and available net asset value.

2.d Net realised profit and loss on sales of investments securities

The net realised profits and losses on sales of investments securities are determined on the basis of average cost and are recognised in the Statement of Operations and Changes in Net Assets under the item “Net realised profit/loss on sales of investment securities”.

2.e Currency translation

The Company’s financial statements are expressed in EUR.

The transactions and acquisition costs denominated in foreign currencies are converted into the accounting currency of each Sub-Fund based on the exchange rate in force on the date of the transaction or acquisition. Assets and liabilities denominated in foreign currencies are converted into the accounting currency of each Sub-Fund based on the exchange rate in force at the end of the financial year. Any resulting realised profits or losses are recognised in the Statement of Operations and Changes in Net Assets under the item “Net realised profit/loss on foreign exchange”.

2.f Liquid assets

Liquid assets and money market instruments are valued at their nominal value plus accrued interest or on the basis of amortized costs.

2.g Transaction fees

The transaction fees, i.e. fees charged by the brokers for securities transactions and similar transactions, are recorded separately in the Statement of Operations and Changes in Net Assets.

2.h Formation expenses

The costs of incorporation of the Company are borne by the Management Company.

2.i Forward foreign exchange contracts

Outstanding forward foreign exchange contracts are valued at the closing date by reference to the forward foreign exchange rate applicable to the outstanding life of the contract. The unrealised net appreciation or depreciation is disclosed in the Statement of Net Assets.

Net realised profit or loss on forward foreign exchange contracts is recorded in the Statement of Operations and Changes in Net Assets under the item “Net realised profit/loss on forward foreign exchange contracts”.

For the details of outstanding forward foreign exchange contracts, please refer to section “Notes to the financial statements - Schedule of derivative instruments”.

2.j Financial Future Contracts

Open financial future contracts are valued at their last known price on the valuation date or on the closing date. The unrealised net appreciation or depreciation is disclosed in the Statements of Net Assets.

Net realised profit or loss on financial future contracts is recorded in the Statement of Operations and Changes in Net Assets under the item “Net realised profit/loss on financial future contracts”.

For the details of outstanding financial future contracts, please refer to section “Notes to the financial statements - Schedule of derivative instruments”.

2.k Options

Options traded on a regulated market are valued on the basis of the last available price at the time when the valuation is carried out. Net realised profit or loss on options is recorded in the Statement of Operations and Changes in Net Assets under the item “Net realised profit/loss on options”.

Other notes to the financial statements as at December 31, 2018 (continued)**2. Principal accounting principles (continued)**2.1 Income

Dividends are recognised as income on the date securities are first quoted ex-dividend. Dividends are recorded net of any eventual withholding taxation. Interest is accrued for each net asset valuation.

2.m Securities lending

The Company may lend securities included in its portfolio to a borrower. To guarantee this transaction, the Company receives a collateral. Securities lending attracts remuneration for the Company according to the contracts and is accounted for in the Statement of operations and changes in net assets under "Securities lending income".

Securities lending are delivered to a third party broker, the assets of which continue to be valued as part of the portfolio of the Company (Note 11).

3. Subscription Tax ("taxe d'abonnement")

The Company is subject in Luxembourg to an annual tax of 0.05%, for all Classes of shares, payable quarterly on the basis of the net assets of the Company as calculated at the end of the relevant quarter, except for the Class I shares which benefits from a reduced "taxe d'abonnement" of 0.01% of the net asset value as the class is reserved to institutional investors.

The net assets invested in collective investment undertakings subject to the "taxe d'abonnement" stipulated by Article 175 (a) of the Law are exempt from the "taxe d'abonnement".

4. Management Company and Performance fees**Management Company fees**

The Management Company receives a management company fee based on the average net asset value of each class of shares, calculated and accrued each valuation day and paid quarterly. The Management Company fee is calculated in arrears and the following maximum rates are applicable:

Sub-Funds	Classes of shares	Management Company fees p.a.

*All these changes were applicable since October 15, 2018.

Performance fees

The Performance fee is provisioned every time the net asset value is calculated. The Performance fee is charged on an annual basis.

It may be charged even if the performance during the year is negative. When the amount of redemptions is higher than the amount of subscriptions, the portion assigned to the Performance fee provision corresponding to that amount (redemptions less subscriptions) accrues to the Management Company on a permanent basis.

In the event that the Sub-Fund underperforms the benchmark index, the Performance fee is readjusted via a provision reversal that is limited to the amount of the existing provision.

The first calculation period of the Performance fee shall start at launch of the Sub-Fund and end at the close of the first financial year.

CPR Invest - Silver Age

15% max. (including tax) of the performance realised by the Sub-Fund relevant class of shares above that of the MSCI Europe Index Net Return in euro + 1% during the financial year, up to a maximum of 2% of the net assets.

There is no calculation of performance fees for the Class A2 - Acc, Class A2 USDH - Acc and Class A2 SGDH - Acc.

CPR Invest - Reactive

25% max. (including tax) of the performance realised by the Sub-Fund relevant class of shares above that of the composite benchmark [50% J.P. Morgan GBI Global Index Hedge Return in euro + 50% MSCI World Index Net Return in euro] during the financial year.

Other notes to the financial statements as at December 31, 2018 (continued)

4. Management Company and Performance fees (continued)

CPR Invest - Defensive

25% max. (including tax) of the performance realised by the Sub-Fund relevant class of shares above that of the composite benchmark [80% J.P. Morgan GBI Global Index Hedge Return in euro + 20% MSCI World Index Net Return in euro] during the financial year, up to a maximum of 0.60% including tax of the net assets.

There is no calculation of performance fees for the Class A - Acc, Class A - Dist and Class F - Acc.

CPR Invest - Euro High Dividend

20% max. (including tax) of the performance realised by the Sub-Fund relevant class of shares above that of the MSCI EMU Index Net Return in euro during the financial year, up to a maximum of 2% including tax of the net assets.

CPR Invest - Dynamic

25% max. (including tax) of the performance realised by the Sub-Fund relevant class of shares above that of the composite benchmark [20% J.P. Morgan GBI Global Index Hedge Return in euro + 80% MSCI World Index Net Return in euro] during the financial year.

CPR Invest - Global Silver Age

15% max. (including tax) of the performance realised by the Sub-Fund relevant class of shares above that of the MSCI World Net Total Return Index (denominated in the currency of each relevant class of shares) during the financial year, up to a maximum of 2% including tax of the net assets.

There is no calculation of performance fees for the Class A2 USD - Acc, Class A2 SGD - Acc, Class A2 SGD - Acc, Class O - Acc, Class T1 - Dist and Class T3 USD - Acc.

CPR Invest - Global Disruptive Opportunities

15% max. (including tax) of the performance realised by the Sub-Fund relevant class of shares above the MSCI World Net Total Return Index (denominated in the currency of each relevant class of shares) during a one year period, up to a maximum of 2% of the net assets. The one year period starts April 1 and end March 31 of the next year.

There is no calculation of performance fees for the Class O - Acc.

CPR Invest - Europe Special Situations

15% max. (including tax) of the performance realised by the Sub-Fund relevant class of shares above the MSCI Europe Net Total Return Index during the financial year, up to a maximum of 2% of the net assets.

CPR Invest - Food for Generations

15% max. (including tax) of the performance realised by the Sub-Fund relevant class of shares above the MSCI World Net Total Return Index during a one year period, up to a maximum of 2% of the net assets. The one year period starts on October 1 and ends on September 30 each year. Exceptionally, the first period started at the launch of the Sub-Fund and will end on September 30, 2018.

There is no calculation of performance fees for the Class O - Acc.

CPR Invest - Megatrends

15% max. (including tax) of the performance realised by the Sub-Fund relevant class of shares above the MSCI World Net Total Return Index in EUR during the financial year, up to a maximum of 2% of the net assets. The first calculation period starts at the launch of the Sub-Fund and ends on December 31 with a minimum calculation period of one year.

CPR Invest - GEAR Emerging (launched on October 11, 2018)

20% max. (including tax) of the performance realised by the Sub-Fund relevant Share Class above the MSCI Emerging Markets in EUR during the one year calculation period, up to a maximum of 1,50% of the net assets. The one year calculation period will start on January 1 and will end on December 31. Exceptionally, the first calculation period of the performance fee will start at the launch of the Sub-Fund and will end on December 31 with a minimum calculation period of one year.

There is no calculation of performance fees for the Class N - Dist.

CPR Invest

Other notes to the financial statements as at December 31, 2018 (continued)

4. Management Company and Performance fees (continued)

CPR Invest - GEAR World (launched on October 11, 2018)

20% max. (including tax) of the performance realised by the Sub-Fund relevant Share Class above the MSCI World All Countries in the currency of each relevant Share Class during the one year calculation period, up to a maximum of 1,50% of the net assets. The one year calculation period will start on April 1 and will end on March 31. Exceptionally, the first calculation period of the performance fee will start at the launch of the Sub-Fund and will end on March 31 with a minimum calculation period of one year.

There is no calculation of performance fees for the Class N - Dist.

CPR Invest - Education (launched on October 2, 2018)

15% max. (including tax) of the performance realised by the Sub-Fund relevant Share Class above MSCI World ACWI Net Total Return Index in the currency of each relevant Share Class during a one year period, up to a maximum of 2% of the net assets. The one year period will start October 1 and end September 30 of the next year. Exceptionally, the first period of calculation will begin at the launch of the Sub-Fund and end September 30, 2019.

There is no calculation of performance fees for the Class O - Acc.

CPR Invest - Smart Beta Credit ESG (launched on December 6, 2018)

15% max. (including tax) of the performance realised by the Sub-Fund relevant Share Class above the BLOOMBERG BARCLAYS EURO AGG CORPORATE Total Return in the currency of each relevant Share Class during a one year period, up to a maximum of 1% of the net assets. The one year period will start January 1st and end December 31 of the next year. Exceptionally, the first period of calculation will begin at the launch of the Sub-Fund and end December 31, with a minimum calculation period of one year.

CPR Invest - Climate Action (launched on December 7, 2018)

15% max. (including tax) of the performance realised by the Sub-Fund relevant Share Class above the MSCI World ACWI Net Total Return Index in the currency of each relevant Share Class during a one year period, up to a maximum of 2% of the net assets. The one year period will start January 1 and end December 31 of the next year. Exceptionally, the first period of calculation will begin at the launch of the Sub-Fund and end December 31, with a minimum calculation period of one year.

CPR Invest - Global Equity ESG (launched on December 13, 2018)

20% max. (including tax) of the performance realised by the Sub-Fund relevant Share Class above the MSCI World All Countries in the currency of each relevant Share Class during a one year period, up to a maximum of 1,50% of the net assets. The one year calculation period will start on April 1 and will end on March 31. Exceptionally, the first calculation period of the performance fee will start at the launch of the Sub-Fund and will end on March 31 with a minimum calculation period of one year.

For the year ended December 31, 2018, the following performance fees have been recorded:

Sub-Funds	Performance fees for the year/period then ended December 31, 2018 (EUR)
CPR Invest - Silver Age	91,433.56

CPR Invest - Global Equity ESG (launched on December 13, 2018)	3,369.43
	3,407,852.97

CPR Invest

Other notes to the financial statements as at December 31, 2018 (continued)

5. Administrative fees

An Administrative fee is applied on the Sub-Funds' average net assets and payable monthly in arrears.

For all the Sub-Funds the maximum rate applicable is 0.30% per annum, except for the following Classes of shares:

- Class N for which 0.10% per annum is applied and 0.20% for Class I, Class
- Class I*, I USD, I GBP, E*, RE, T1, T3 USD and Z for which 0.20% per annum is applied

*0.30% per annum is applied for the Sub-Fund CPR Invest - Climate Action (launched on December 7, 2018)

The above rates include the remuneration of the Administrative Agent for its services as Administrative Agent, Depositary and Transfer Agent.

The aggregated Administrative fees and Management Company fee (Note 4) should not exceed, at any time, the following maximum annual rates:

6. Statement of changes in the securities portfolio

The Statement of changes in the securities portfolio for the year from January 1, 2018 to December 31, 2018 is available free of charge at the Company's registered office.

7. Master-Feeder structure

The Sub-Funds CPR Invest - Silver Age, CPR Invest - Reactive, CPR Invest - Defensive, CPR Invest - Euro High Dividend and CPR Invest - Dynamic are each Feeder of a Master Fund, a French Mutual Investment Fund authorized by the *Autorité des Marchés Financiers* as a UCITS, as described as follows, and invests at least 85% of its assets in units of the Master Fund. The Sub-Funds may hold up to 15% of its assets in one or more of the following:

- Ancillary liquid assets,
- Financial derivative instruments, which may be used only for hedging purposes.

The Sub-Funds and the Master Funds are both managed by the Management Company.
The financial years of the Master Funds end on December 31 each year.

The Feeder Sub-Funds are investing in Class T units of their respective Master Funds as follows:

Feeder Sub-Funds	Master Funds	% of Class T units
CPR Invest - Silver Age	CPR Silver Age	100.00%
CPR Invest - Reactive	CPR Croissance Réactive	100.00%
CPR Invest - Defensive	CPR Croissance Défensive	100.00%
CPR Invest - Euro High Dividend	CPR Euro High Dividend	100.00%
CPR Invest - Dynamic	CPR Croissance Dynamique	100.00%

The investment objective of each Sub-Fund is the same as the Master Fund:

CPR Invest - Silver Age:

The Master Fund's objective is to outperform the European equity markets over the long-term, at least 5 years, by taking advantage of the momentum of European equities associated with the ageing of the population.

CPR Invest - Reactive:

The Master Fund's objective is to deliver over the medium term – with a minimum of 4 years – a higher return than the one of the composite benchmark: [50% J.P. Morgan GBI Global Index Hedge Return in euro + 50% MSCI World Index Net Return in euro].

CPR Invest - Defensive:

The Master Fund's objective is to deliver, net of management fees, over the medium term – 2 years minimum – a higher return than the one of the composite benchmark: [80% J.P. Morgan GBI Global Index Hedge Return in euro + 20% MSCI World Index Net Return in euro] with an expected maximum volatility of 7%.

CPR Invest

Other notes to the financial statements as at December 31, 2018 (continued)

7. Master-Feeder structure (continued)

CPR Invest - Euro High Dividend:

The Master Fund's objective is to deliver over a long-term investment horizon – at least 8 years – a higher return than the one of the benchmark MSCI EMU Index Net Return in euro, by selecting securities with a higher dividend rate (dividend to share price) than the average dividend rate of the securities included in the MSCI EMU.

CPR Invest - Dynamic:

The Master Fund's investment objective is to deliver over a long-term investment horizon – at least 5 years – a higher return than the one of the composite benchmark: [20% J.P. Morgan GBI Global Index Hedge Return in euro + 80% MSCI World Index Net Return in euro].

At the level of the Master Funds, the fees, charges and expenses associated with the investments are the operating and management fees covering all the expenses invoiced directly to the Master Funds, with the exception of transaction fees.

As at December 31, 2018, the maximum operating and management fees charged by the Master Funds for the class of units held by the Feeder Sub-Funds (Class T) is equal to 0.15%.

For the year ended December 31, 2018, the total fees charged for the Feeder Sub-Funds and for the Master Funds are as follows:

Feeder Sub-Funds	Total fees in EUR	% year-end NAV
CPR Invest - Silver Age	6,320,743.22	1.83%
CPR Invest - Reactive	6,089,982.05	1.44%
CPR Invest - Defensive	3,027,258.82	1.39%
CPR Invest - Euro High Dividend	283,596.99	1.88%
CPR Invest - Dynamic	685,216.49	1.23%

Master Funds	Total fees in EUR	% year-end NAV
CPR Silver Age	20,120 177.70	1.09%
CPR Croissance Reactive	11,852 558.38	0.99%
CPR Croissance Défensive	5,075,846.08	0.85%
CPR Euro High Dividend	2,511,840.55	1.12%
CPR Croissance Dynamique	2,466,085.44	0.93%

Complete information about the Master Funds, including current prospectus, KIIDs, regulations, articles of incorporation and financial reports can be obtained free of charge at the Management Company's postal address, 90, Boulevard Pasteur, CS 61595, F-75730 Paris, France.

8. Cross-Investments

As at December 31, 2018, the cross investments amounted to EUR 5,127,145.64.

The Sub-Fund CPR Invest - Megatrends is investing 14.66% of its net assets as at December 31, 2018 in the Sub-Fund CPR Invest - Global Silver Age, 10.73% in the Sub-Fund CPR Invest - Global Disruptive Opportunities, 12.32% in the Sub-Fund CPR Invest - Food for Generations and 7.20% in the Sub-Fund CPR Invest - Education.

The Sub-Fund CPR Invest - GEAR World (launched on October 11, 2018) is investing 1.63% of its net assets as at December 31, 2018 in the Sub-Fund CPR Invest - Global Equity ESG (launched on December 13, 2018).

The consolidated net assets without such cross investments amounts to EUR 3,097,392,737.47.

There is no restatement of Management fee for the Sub-Funds CPR Invest - Megatrends and CPR Invest - GEAR World (launched on October 11, 2018) relative to these investments in other Sub-Funds of the Company.

Voting rights on these cross investments are suspended in respect of the Article 181 (8) of the Law.

CPR Invest

Other notes to the financial statements as at December 31, 2018 (continued)

9. Related Party Investments

During the year 2018, the Company invested its assets in the units of other investment funds promoted by CPR Asset Management or other entities from the same group. As the Company intends to invest in other target investment funds, there may be duplication of management, subscription, redemption and conversion fees for sub-funds investing in them. The Company will endeavour to ensure that the minimum level of underlying fees be applicable to the sub-fund when investing in target investment funds.

In the case where a substantial proportion of the net assets are invested in investment funds the prospectus of the relevant Sub-Fund will specify the maximum management fee (excluding any performance fee, if any) charged to the Sub-Fund and each of the UCITS or other UCIs concerned.

These investments do not give rise to a modification of the management fees borne by the aforementioned Sub-Funds.

The Directors for their services to the Company, do not receive any customary fees for the year ended December 31, 2018.

10. Dividends paid

The Board of Directors of the Company resolved to distribute for the year ended December 31, 2018 dividends for the Distribution share classes of the following Sub-Funds:

Sub-Funds	Classes of shares	Currency	Dividend per Share	Ex-Date	Pay-Date
CPR Invest - Silver Age	Class A	EUR	4.29	09/05/2018	15/05/2018
CPR Invest - Defensive	Class A	EUR	26.68	09/05/2018	15/05/2018
CPR Invest - Euro High Dividend	Class A	EUR	58.09	09/05/2018	15/05/2018
CPR Invest - Global Silver Age	Class T1	EUR	57.60	09/05/2018	15/05/2018
CPR Invest - Europe Special Situations	Class Z	EUR	65.99	09/05/2018	15/05/2018

11. Securities lending

During the year, the Company participated in a securities lending program concerning the Sub-Funds CPR Invest - Global Silver Age and CPR Invest - Global Disruptive Opportunities.

As at December 31, 2018, the following Sub-Funds have securities lent:

Sub-Funds	Currency	Market value of securities lent	Collateral securities	Collateral cash	% of Collateral received
CPR Invest - Global Silver Age	EUR	45,472,998.65	4,516,584.70	48,988,489.00	118%
CPR Invest - Global Disruptive Opportunities	EUR	185,848,757.58	0.00	188,646,838.00	102%
	TOTAL	231,321,756.23	4,516,584.70	237,635,327.00	

As at December 31, 2018, the following securities have been received as collateral:

Security name	ISIN	Market value of securities received as collateral
VONOVIA SE	DE000A1ML7J1	2,933,935.72
PEUGEOT	FR0000121501	1,582,648.98
	TOTAL	4,516,584.70

The counterparty of securities lending agreements are Société Générale, Paris and Goldman Sachs International Finance.

Unaudited information

1. Global exposure calculation method

The method used to calculate overall exposure of the Sub-Funds is the commitment calculation method.

2. Total Expenses Ratio (TER)

The TER is calculated by dividing the expenses, excluding transaction fees and performance fees, by the average net assets of the Sub-Funds.

The TERs for the year ended December 31, 2018, excluding performance fees and accrued transaction fees, are as follows:

Sub-Funds	Classes of shares	TER
CPR Invest - Silver Age	Class A - Acc	1.65%

The Sub-Funds have Société Générale Paris and Goldman Sachs International as counterparties for securities lending positions and as depositary for collateral received. All transactions are bilateral transactions. Cash collateral is not reused.

Unaudited information (continued)**4. Remuneration policy****1. Remuneration policy and procedures for employees of the management company**

The remuneration policy implemented within CPR Asset Management ("CPR AM") complies with the remuneration provisions mentioned in Directive 2011/61/EU of the European Parliament and Council of 8 June 2011 on Alternative Investment Fund Managers (hereinafter the

"*IAMF Directive*") and in Directive 2014/91/EU of 23 July 2014 on UCITS (hereinafter the

"*UCITS V Directive*"). These rules, which concern the structures, practices and remuneration policy of the manager, are intended to help strengthen sound, efficient and controlled management of the risks faced by both the management company and the funds under management.

This policy is part of the Amundi Group's remuneration policy, which is reviewed annually by its Remuneration Committee. At its meeting of 1 February 2018, it approved the policy applicable pursuant to the 2017 financial year and its compliance with the principles of the AIFM and UCITS V directives. The policy applicable pursuant to the 2017 financial year was reviewed during a meeting of the Remuneration Committee on 1 February 2018 and renewed in 2018.

The implementation of Amundi's remuneration policy was the subject of an internal, central and independent evaluation conducted by Amundi Internal Audit during 2018.

1.1 Amount of remuneration paid by the manager to its employees

In 2018, the total amount of remuneration (including deferred and non-deferred fixed and variable remuneration) paid by CPR AM to all its employees (i.e. 108 beneficiaries at 31 December 2018) amounted to €12,768,859. This amount breaks down as follows:

- Total fixed remuneration paid by CPR AM for the year: €8,927,160, representing 70% of the total remuneration paid by the manager to all of its personnel, was paid in the form of fixed remuneration.
- Total amount of deferred and non-deferred variable remuneration paid by CPR AM during the year: €3,841,699, 30% of the total remuneration paid by the manager to all of its personnel, was in this form. All employees are eligible for the variable remuneration scheme.

In addition, no carried interest was paid for the year.

Due to the small number of "executives and senior managers" (3 persons at 31 December 2018) and "decision-making managers" whose activities have a significant impact on the risk profile of funds under management (6 persons at 31 December 2018), the total amount of remuneration (fixed and variable deferred and non-deferred bonuses) paid to these classes of personnel is not published.

1.2 Impact of remuneration policy and practices on the risk profile and the management of conflicts of interest

The Amundi Group has adopted a policy and implemented remuneration practices in accordance with the most recent legislative, regulatory and procedural changes introduced by the regulatory authorities for all its Management Companies.

The Amundi Group has also identified its Identified Personnel, which includes all employees of the Amundi Group who exercise decision-making power over the management of companies or funds under management and who may therefore have a significant impact on the performance or risk profile.

The variable remuneration granted to Amundi Group employees is determined by combining an evaluation of the performance of the employee concerned, the business unit to which he/she belongs and the Group's overall results. This evaluation of individual performance takes into account both financial and non-financial criteria, as well as compliance with sound risk management rules.

Unaudited information (continued)**4. Remuneration policy (continued)**

The criteria used for evaluating performance and awarding variable remuneration depend on the nature of the function performed:

1. Selection and portfolio management functions

Standard financial criteria:

- Gross and net performance of the fund managed over 1 and 3 years;
- Information and Sharpe ratios over 1, 3 and 5 years;
- Performance fees generated during the fiscal year, if applicable;
- Competitive classifications;
- Contribution to net inflows for the year.

Standard non-financial criteria:

- Compliance with internal risk prevention and risk management rules (Risk/Compliance);
- Innovation / product development;
- Cross-functionality, sharing of best practices and collaboration;
- Contribution to sales commitment;
- Quality of management.

2. Sales functions

Standard financial criteria:

- Net inflows;
- Receipts;
- Gross collection; development and retention of clientele; range of products;

Standard non-financial criteria:

- Joint consideration of the interests of Amundi and the customer;
- Customer satisfaction and quality of the commercial relationship;
- Quality of management;
- Securing/development of business assets;
- Cross-functionality and sharing of best practices;
- Spirit of enterprise.

3. Support and control functions

With respect to control functions, performance evaluation and variable remuneration awards are independent of the performance of the business sectors they control.

The criteria usually taken into account are as follows:

- Primarily criteria related to the achievement of their own objectives (risk management, quality control, project implementation, improvement of tools and systems, etc.).
- When financial criteria are used, they mainly focus on cost management and optimisation.

The performance criteria set out above, and in particular those applied to the Identified Personnel responsible for management, are more broadly in line with the regulations applicable to the funds under management and the investment policy of the investment committee of the manager.

In addition, the Amundi Group has put in place measures for all its employees to align remuneration with long-term performance and risks and to limit the risk of conflicts of interest.

In this respect, in particular:

- The implementation of a deferred scale, in accordance with the requirements of the IAMF and UCITS V Directives.
- The deferred portion of the bonus for Identified Personnel employees is paid in instruments that are 100% indexed to the performance of a representative basket of funds.
- The final vesting of the deferred portion is linked to Amundi's financial situation, the employee's continued employment within the Group and his or her sound and controlled risk management throughout the entire vesting period.
